**ANDREW OWEN**

President
Allspring Funds

Dear Shareholder:

We are pleased to offer you this annual report for the Allspring VT Discovery SMID Cap Growth Fund for the 12-month period that ended December 31, 2023. Effective May 1, 2023, the Fund changed its name from Allspring VT Discovery Fund to Allspring VT Discovery SMID Cap Growth Fund. Globally, stocks and bonds experienced high levels of volatility throughout the period but had positive overall results. The market was focused on persistently high inflation and the impact of ongoing aggressive central bank rate hikes. Compounding these concerns were the global reverberations of the Russia-Ukraine war. Riskier assets rallied in 2023, as investors anticipated an end to the tight monetary policy despite concerns of a possible recession. After suffering deep and broad losses through 2022, bonds now benefit from a base of higher yields that can help generate higher income.

For the 12-month period, stocks generally outperformed bonds—both domestic U.S. and global. For the period, U.S. stocks, based on the S&P 500 Index,¹ gained 26.29%. International stocks, as measured by the MSCI ACWI ex USA Index (Net),² returned 15.62%, while the MSCI EM Index (Net) (USD)³ had more modest performance, with a gain of 9.83%. Among bond indexes, the Bloomberg U.S. Aggregate Bond Index⁴ returned 5.53%, the Bloomberg Global Aggregate ex-USD Index (unhedged)⁵ gained 5.72%, the Bloomberg Municipal Bond Index⁶ returned 6.40%, and the ICE BofA U.S. High Yield Index⁷ gained 13.54%.

Despite high inflation and central bank rate hikes, markets rallied.

The year 2023 began with a rally across global equities and fixed income securities. Investor optimism rose in response to data indicating declining inflation rates and the reopening of China's economy with the abrupt end to its zero-COVID-19 policy. The U.S. reported strong job gains and unemployment fell to 3.4%—the lowest level since 1969. Meanwhile, wage growth, seen as a potential contributor to ongoing high inflation, continued to moderate. All eyes remained on the Federal Reserve (Fed) and on how many more rate hikes remain in this tightening cycle. The 0.25% federal funds rate hike announced in January was the Fed's smallest rate increase since March 2022.

Markets declined in February as investors responded unfavorably to resilient economic data. The takeaway: Central banks would likely continue their monetary tightening cycle for longer than markets had priced in. In this environment—where strong economic data is seen as bad news—the resilient U.S. labor market was taken as a negative, with inflation not falling quickly enough for the Fed, which raised interest rates by 0.25% in February. Meanwhile, the Bank of England (BoE) and the European Central Bank (ECB) both raised rates by 0.50%.

¹ The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value-weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.

² The Morgan Stanley Capital International (MSCI) All Country World Index (ACWI) ex USA Index (Net) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. Source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, reviewed, or produced by MSCI. You cannot invest directly in an index.

³ The MSCI Emerging Markets (EM) Index (Net) (USD) is a free-float-adjusted market-capitalization-weighted index that is designed to measure the equity market performance of emerging markets. You cannot invest directly in an index.

⁴ The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S.-dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities. You cannot invest directly in an index.

⁵ The Bloomberg Global Aggregate ex-USD Index (unhedged) is an unmanaged index that provides a broad-based measure of the global investment-grade fixed-income markets excluding the U.S.-dollar-denominated debt market. You cannot invest directly in an index.

⁶ The Bloomberg Municipal Bond Index is an unmanaged index composed of long-term tax-exempt bonds with a minimum credit rating of Baa. You cannot invest directly in an index.

⁷ The ICE BofA U.S. High Yield Index is a market-capitalization-weighted index of domestic and Yankee high yield bonds. The index tracks the performance of high yield securities traded in the U.S. bond market. You cannot invest directly in an index. Copyright 2024. ICE Data Indices, LLC. All rights reserved.

The collapse of Silicon Valley Bank in March—the second-largest banking failure in U.S. history—led to a bank run that spread to Europe, where Switzerland’s Credit Suisse was taken over by its rival, UBS. The banking industry turmoil created an additional challenge for central banks in balancing inflationary concerns against potential economic weakening. Meanwhile, recent data pointed to economic strength in the U.S., Europe, and China. And China’s economy continued to rebound after the removal of its COVID-19 lockdown. Inflation rates in the U.S., the U.K., and the eurozone all remained higher than central bank targets, leading to additional rate hikes in March.

Economic data released in April pointed to global resilience, as Purchasing Managers Indexes¹ in the U.S., U.K., and eurozone beat expectations and China reported first-quarter annualized economic growth of 4.5%. Despite banking industry stress, developed market stocks had monthly gains. The U.S. labor market remained strong, with a 3.5% jobless rate and monthly payroll gains above 200,000. However, uncertainty and inflationary concerns weighed on investors in the U.S. and abroad.

May was marked by a divergence between expanding activity in services and an overall contraction in manufacturing activity in the U.S., U.K., and eurozone. Core inflation remained elevated in the U.S. and Europe, despite the ongoing efforts of the Fed and the ECB, which included rate hikes of 0.25% by both in May. Stubborn inflation and the resilient U.S. labor market led to expectations of further interest rate hikes, overall monthly declines across bond indexes, and mixed results for stocks in May. Investor worries over a U.S. debt ceiling impasse were modest, and market confidence was buoyed by a deal in late May to avert a potential U.S. debt default.

June featured the Fed’s first pause on interest rate hikes since March 2022, when it began its aggressive campaign to rein in inflation. However, inflation, as measured by the Core Consumer Price Index (CPI)², while continuing to decline, remained stubbornly high in June at 4.8%, well above the Fed’s 2.0% target rate. With the U.S. unemployment rate still at 3.6%, near a historical low, and U.S. payrolls growing in June for the 30th consecutive month, expectations of more Fed rate hikes were reinforced. However, U.S. and global stocks had strong returns in June.

July was a good month for stocks. However, bonds had more muted but positive monthly returns overall. Riskier sectors and regions tended to do well, as investors grew more optimistic regarding economic prospects. With strong second-quarter gross domestic product (GDP) growth—initially estimated at 2.4%—and U.S. annual inflation easing steadily to 3.2% in July, hopes for a soft economic landing grew. The Fed, the ECB, and the BoE all raised their respective key interest rates by 0.25% in July. In the Fed’s case, speculation grew that it could be very close to the end of its tightening cycle. Meanwhile, China’s economy showed signs of stagnation, renewing concerns of global fallout.

Stocks retreated in August while monthly bond returns were flat overall. Increased global market volatility reflected unease over the Chinese property market being stressed along with weak Chinese economic data. On a more positive note, speculation grew over a possible end to the Fed’s campaign of interest rate increases or at least a pause in September. U.S. economic data generally remained solid, with resilient job market data and inflation ticking up slightly in August, as the annual CPI³ rose 3.7%. However, the three-month trend for Core CPI stood at a more encouraging annualized 2.4%.

“ The collapse of Silicon Valley Bank in March—the second-largest banking failure in U.S. history—led to a bank run that spread to Europe, where Switzerland’s Credit Suisse was taken over by its rival, UBS. ”

¹ The Purchasing Managers Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. You cannot invest directly in an index.

² The Core Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services excluding energy and food prices. You cannot invest directly in an index.

³ The CPI is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. You cannot invest directly in an index.

Stocks and bonds both had negative overall returns in September as investors reluctantly recited the new chorus of “higher for longer,” led by the Fed’s determination not to lower interest rates until it knows it has vanquished its pesky opponent—higher-than-targeted inflation. As of September, the two primary gauges of U.S. inflation—the annual Core Personal Consumption Expenditures Price Index¹ and the CPI—both stood at roughly 4%, twice as high as the Fed’s oft-stated 2% target. The month ended with the prospect of yet another U.S. government shutdown, averted at least temporarily but looming later this fall.

October was a tough month for stocks and bonds. Key global and domestic indexes all were pushed down by rising geopolitical tensions, particularly the Israel-Hamas conflict, and concerns over the Fed’s “higher for longer” monetary policy. The U.S. 10-year Treasury yield rose above 5% for the first time since 2007. Commodity prices did well as oil prices rallied in response to the prospect of oil supply disruptions from the Middle East. U.S. annualized third-quarter GDP was estimated at a healthier-than-anticipated 4.9%. China’s GDP indicated surprisingly strong industrial production and retail sales, offset by ongoing weakness in its real estate sector.

“ In November, the market mood turned positive as cooling inflation inspired confidence that central banks could hold off on further rate hikes. ”

In November, the market mood turned positive as cooling inflation inspired confidence that central banks could hold off on further rate hikes. Overall annual inflation in the U.S. fell to 3.1% in November while 12-month inflation in the U.K. and eurozone eased to 4.6% and 2.4%, respectively—far below their peak levels of mid-2022. Third quarter annualized U.S. GDP growth was raised to an estimated 5.2% while U.S. job totals rose by just below 200,000 in November, indicating a slight cooling of the labor market. All of this fresh evidence added to confidence for a U.S. soft economic landing, leading to a more buoyant mood heading into winter as the Federal Open Market Committee held rates steady at its December meeting.

The broad year-end rally among stocks and bonds that began in November continued through December as investors became more confident that monetary policy would ease in 2024. Supporting the bubbly market mood were a series of reports confirming lower inflationary trends in the U.S. and Europe. During the period, it appeared more likely that the U.S. economy could achieve a soft landing, cooling enough to lower inflation without the pain of a recession. However, by year-end, an expectations gap developed. Capital markets priced in a total of 1.50 percentage points in federal funds rate cuts in 2024—twice as much as the three cuts of 0.25% hinted at by Fed officials.

¹ The Core Personal Consumption Expenditures Price Index (PCE) is a measure of prices that people living in the United States, or those buying on their behalf, pay for goods and services. It is sometimes called the core PCE price index, because two categories that can have price swings – food and energy – are left out to make underlying inflation easier to see. You cannot invest directly in an index.

Don't let short-term uncertainty derail long-term investment goals.

Periods of investment uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. To help you create a sound strategy based on your personal goals and risk tolerance, Allspring Funds offers more than 100 mutual funds spanning a wide range of asset classes and investment styles. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with Allspring Funds. We appreciate your confidence in us and remain committed to helping you meet your financial needs.

Sincerely,

Andrew Owen
President
Allspring Funds

Notice to Shareholders

Beginning in July 2024, the Fund will be required by the Securities and Exchange Commission to send shareholders a paper copy of a new tailored shareholder report in place of the full shareholder report that you are now receiving. The tailored shareholder report will contain concise information about the Fund, including certain expense and performance information and fund statistics. If you wish to receive this new tailored shareholder report electronically, please follow the instructions on the back cover of this report.

Other information that is currently included in the shareholder report, such as the Fund's financial statements, will be available online and upon request, free of charge, in paper or electronic format.

Performance highlights

Investment objective	The Fund seeks long-term capital appreciation.

Portfolio managers	Michael T. Smith, CFA, Christopher J. Warner, CFA

AVERAGE ANNUAL TOTAL RETURNS (%) AS OF DECEMBER 31, 2023

	INCEPTION DATE	1 YEAR	5 YEAR	10 YEAR	EXPENSE RATIOS ¹ (%)	
					GROSS	NET ²
Class 2	5-8-1992	20.14	9.90	7.43	1.16	1.15
Russell 2500™ Growth Index ³	–	18.93	11.43	8.78	–	–

Figures quoted represent past performance, which is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of dividends and capital gains. Current month-end performance is available by calling 1-800-260-5969. Performance figures of the Fund do not reflect fees and expenses charged pursuant to the terms of variable life insurance policies and variable annuity contracts. If these fees and expenses had been reflected, performance would have been lower.

Index returns do not include transaction costs associated with buying and selling securities, any mutual fund fees or expenses, or any taxes. It is not possible to invest directly in an index.

Shares are sold without a front-end sales charge or contingent deferred sales charge.

¹ Reflects the expense ratios as stated in the most recent prospectus. The expense ratios shown are subject to change and may differ from the annualized expense ratios shown in the Financial Highlights of this report.

² The manager has contractually committed through April 30, 2024, to waive fees and/or reimburse expenses to the extent necessary to cap total annual fund operating expenses after fee waivers at 1.15% for Class 2 shares. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees. Without these caps, the Fund's returns would have been lower. The expense ratio paid by an investor is the net expense ratio (the total annual fund operating expenses after fee waivers) as stated in the prospectus.

³ The Russell 2500™ Growth Index measures the performance of those Russell 2500™ companies with higher price/book ratios and higher forecasted growth values. You cannot invest directly in an index.

Stock values fluctuate in response to the activities of individual companies and general market and economic conditions. Smaller-company stocks tend to be more volatile and less liquid than those of larger companies. Certain investment strategies tend to increase the total risk of an investment (relative to the broader market). This fund is exposed to foreign investment risk. Consult the Fund's prospectus for additional information on these and other risks.

Please refer to the prospectus provided by your participating insurance company for detailed information describing the separate accounts for information regarding surrender charges, mortality and expense risk fees, and other charges that may be assessed by the participating insurance companies.

GROWTH OF \$10,000 INVESTMENT AS OF DECEMBER 31, 2023¹

¹ The chart compares the performance of Class 2 shares for the most recent ten years with the Russell 2500™ Growth Index. The chart assumes a hypothetical investment of \$10,000 in Class 2 shares and reflects all operating expenses of the Fund but does not reflect fees and expenses charged pursuant to the terms of variable life insurance policies and variable annuity contracts.

MANAGER'S DISCUSSION

Fund highlights

- The Fund outperformed its benchmark, the Russell 2500™ Growth Index, for the 12-month period that ended December 31, 2023.
- Security selection in the consumer discretionary and industrials sectors, along with a material underweight to the energy sector, contributed to the Fund's results.
- Holdings within the communication services and information technology (IT) sectors detracted from relative performance.

Market leadership was concentrated for much of 2023.

The year started with high inflation and financial tightening producing a resounding call for a recession in 2023, yet the year ended on a positive note for most major U.S. equity indexes. Supported by healthy labor markets, declining inflation metrics, and a resilient consumer, earnings results largely exceeded expectations. Most notably, companies connected to artificial intelligence and GLP-1s (glucagon-like peptide-1) garnered significant attention and saw their valuations soar. For much of the year, the "Magnificent 7" stocks substantially outperformed the rest of the U.S. equity universe, boosting returns in large-cap indexes while restrictive policy rates deterred sentiment for small-cap stocks. However, along with favorable economic data, a dovish shift in tone from the Federal Reserve fueled a market rally late in the year. After trailing the Magnificent 7 for most of the year, market leadership broadened out in the fourth quarter and a soft landing became the consensus outlook for 2024.

TEN LARGEST HOLDINGS (%) AS OF DECEMBER 31, 2023¹

Casella Waste Systems, Inc. Class A	2.51
Teledyne Technologies, Inc.	2.22
SiteOne Landscape Supply, Inc.	2.22

Tetra Tech, Inc.	1.95
Morningstar, Inc.	1.91
Novanta, Inc.	1.83

¹ Figures represent the percentage of the Fund's net assets. Holdings are subject to change and may have changed since the date specified.

Security selection in industrials and consumer discretionary contributed to relative performance.

Within industrials, Saia, Inc., contributed to performance. Saia is a short-haul trucking company that specializes in e-commerce fulfillment. During the year, shipment volumes and contract renewals exceeded expectations. Additionally, the dissolution of a key competitor created a unique opportunity for Saia to expand its distribution network. We hold conviction in Saia's ability to execute, but we modestly trimmed the position due to elevated valuation.

In consumer discretionary, MercadoLibre, Inc., also contributed. MercadoLibre, a leading e-commerce and payments platform in Latin America, launched services to boost user engagement and advertising

revenue. Improving profitability and a leading technology platform provide multiple growth opportunities for MercadoLibre. We have held MercadoLibre within our portfolio for several years and continue to believe in its potential to deliver superior future returns.

Stock selection within communication services and IT detracted from relative performance.

Within communication services, ZoomInfo Technologies, Inc., detracted from performance. ZoomInfo hosts a global database that connects sale and marketing professionals with prospective clients. During the year, layoffs within the tech industry and pauses within corporate discretionary spending decreased demand for ZoomInfo. When sales did not reaccelerate as recession fears receded, our sell discipline was triggered and we exited the position.

BILL Holdings, Inc., in IT, also detracted from performance. BILL provides cloud-based software that enables small and medium-size businesses to digitize back-office functions. In return, BILL receives subscription fees and a portion of each transaction processed on its platform. Macro headwinds resulted in many of BILL's customers reducing advertising and discretionary spending, which adversely affected BILL's transactional revenue. We still hold the position but we are closely monitoring fundamentals.

SECTOR ALLOCATION AS OF DECEMBER 31, 2023¹

¹ Figures represent the percentage of the Fund's long-term investments. Allocations are subject to change and may have changed since the date specified.

Staying balanced, with a skew toward quality.

The recent year was positive for equities, with most major U.S.-based equity indexes producing healthy gains. While the rally in December created optimism going into 2024, we believe investors should guard against extrapolating near-term signals. Consensus expectations are now for double-digit earnings growth for S&P 500 companies in the next year. Given lingering inflation uncertainties and the delayed impact of higher rates, we are concerned that this could be an optimistic bar for the market to clear. With elevated valuations and expectations, the markets may experience a negative surprise. Our strategy for navigating this environment is to be balanced and highly selective. We are placing a

priority on companies with profitable business models, free cash flow generation, and strong management execution.

We think there are exciting opportunities in small- and mid-cap growth stocks, which still trade at compelling relative valuations to large caps. Should the economy avoid a sharp downturn, there is considerable upside in smaller companies on the other side of a recovery. Most importantly, after a long period of hyperfocus on monetary policy, we are encouraged to see investors become more discerning toward company fundamentals. When it comes to compounding wealth, investors are realizing that profits may matter more than interest rates. This is an encouraging trend that we expect to continue.

Fund expenses

As a shareholder of the Fund, you incur ongoing costs, including management fees, distribution (12b-1) fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the six-month period and held for the entire period from July 1, 2023 to December 31, 2023.

Actual expenses

The "Actual" line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the "Actual" line under the heading entitled "Expenses paid during period" for your applicable class of shares to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The "Hypothetical" line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any separate account charges assessed by participating insurance companies. Therefore, the "Hypothetical" line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these separate account charges assessed by participating insurance companies were included, your costs would have been higher.

	BEGINNING ACCOUNT VALUE 7-1-2023	ENDING ACCOUNT VALUE 12-31-2023	EXPENSES PAID DURING THE PERIOD ¹	ANNUALIZED NET EXPENSE RATIO
Actual	\$1,000.00	\$1,019.40	\$5.82	1.15%
Hypothetical (5% return before expenses)	\$1,000.00	\$1,019.30	\$5.82	1.15%

¹ Expenses paid is equal to the annualized net expense ratio multiplied by the average account value over the period, multiplied by 183 divided by 365 (to reflect the one-half-year period).

REIT Real estate investment trust

Investments in affiliates

An affiliated investment is an investment in which the Fund owns at least 5% of the outstanding voting shares of the issuer or as a result of other relationships, such as the Fund and the issuer having the same investment manager. Transactions with issuers that were affiliates of the Fund at the end of the period were as follows:

	VALUE, BEGINNING OF PERIOD	PURCHASES	SALES PROCEEDS	NET REALIZED GAINS (LOSSES)	NET CHANGE IN UNREALIZED GAINS (LOSSES)	VALUE, END OF PERIOD	SHARES, END OF PERIOD	INCOME FROM AFFILIATED SECURITIES

Notes to financial statements

1. ORGANIZATION

Allspring Variable Trust (the "Trust"), a Delaware statutory trust organized on March 10, 1999, is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). As an investment company, the Trust follows the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946, *Financial Services – Investment Companies*. These financial statements report on the Allspring VT Discovery SMID Cap Growth Fund (formerly, Allspring VT Discovery Fund) (the "Fund") which is a diversified series of the Trust. The Trust offers shares of the Fund to separate accounts of various life insurance companies as funding vehicles for certain variable annuity contracts and variable life insurance policies.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Equity securities and exchange-traded funds that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price.

Investments in registered open-end investment companies (other than those listed on a foreign or domestic exchange or market) are valued at net asset value.

Investments which are not valued using the methods discussed above are valued at their fair value, as determined in good faith by Allspring Funds Management, LLC ("Allspring Funds Management"), which was named the valuation designee by the Board of Trustees. As the valuation designee, Allspring Funds Management is responsible for day-to-day valuation activities for the Allspring Funds. In connection with these responsibilities, Allspring Funds Management has established a Valuation Committee and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities. On a quarterly basis, the Board of Trustees receives reports of valuation actions taken by the Valuation Committee. On at least an annual basis, the Board of Trustees receives an assessment of the adequacy and effectiveness of Allspring Funds Management's process for determining the fair value of the portfolio of investments.

Securities lending

During the period, the Fund participated in a program to lend its securities from time to time in order to earn additional income in the form of fees or interest on securities received as collateral or the investment of any cash received as collateral. When securities were on loan, the Fund received interest or dividends on those securities. Cash collateral received in connection with its securities lending transactions was invested in Securities Lending Cash Investments, LLC (the "Securities Lending Fund"), an affiliated non-registered investment company. Interests in the non-registered investment company that were redeemable at net asset value were fair valued normally at net asset value. Effective at the close of business on March 29, 2023, the Fund is no longer participating in the securities lending program and the Securities Lending Fund was liquidated. Securities Lending Fund was managed by Allspring Funds Management and was subadvised by Allspring Global Investments, LLC ("Allspring Investments"), an affiliate of Allspring Funds Management and wholly owned subsidiary of Allspring Global Investments Holdings, LLC. Allspring Funds Management received an advisory fee starting at 0.05% and declining to 0.01% as the average daily net assets of the Securities Lending Fund increased. All of the fees received by Allspring Funds Management were paid to Allspring Investments for its services as subadviser.

Income earned from investment in the Securities Lending Fund (net of fees and rebates), if any, is included in income from affiliated securities on the Statement of Operations.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Dividend income is recognized on the ex-dividend date. Dividend income is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Interest earned on cash balances held at the custodian is recorded as interest income.

Distributions received from REIT investments may be characterized as ordinary income, capital gains, or a return of capital to the Fund based on information provided by the REIT. The proper characterization of REIT distributions is generally not known until after the end of each calendar year. As such, estimates may be used in reporting the character of income and distributions for financial statement purposes.

Distributions to shareholders

Distributions to shareholders from net investment income and any net realized gains are recorded on the ex-dividend date and paid at least annually. Such distributions are determined in accordance with income tax regulations and may differ from U.S. generally accepted accounting principles. Dividend sources are estimated at the time of declaration. The tax character of distributions is determined as of the Fund's fiscal year end. Therefore, a portion of the Fund's distributions made prior to the Fund's fiscal year end may be categorized as a tax return of capital at year end.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns, as applicable, for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of December 31, 2023, the aggregate cost of all investments for federal income tax purposes was \$118,313,061 and the unrealized gains (losses) consisted of:

Gross unrealized gains	\$24,017,123
Gross unrealized losses	(5,730,815)
Net unrealized gains	\$18,286,308

Reclassifications are made to the Fund's capital accounts for permanent tax differences to reflect income and gains available for distribution (or available capital loss carryforwards) under federal income tax regulations. U.S. generally accepted accounting principles require that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset values per share. The primary permanent difference causing such reclassification are due to dividends from certain securities and net operating loss. At December 31, 2023, as a result of permanent book-to-tax differences, the following reclassification adjustments were made on the Statement of Assets and Liabilities:

PAID-IN CAPITAL	TOTAL DISTRIBUTABLE EARNINGS
\$(912,444)	\$912,444

As of December 31, 2023, the Fund had capital loss carryforwards which consist of \$6,874,659 in short-term capital losses and \$8,977,436 in long-term capital losses.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1—quoted prices in active markets for identical securities
- Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of December 31, 2023:

	QUOTED PRICES (LEVEL 1)	OTHER SIGNIFICANT OBSERVABLE INPUTS (LEVEL 2)	SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)	TOTAL
Assets				
Investments in:				
Common stocks				
<i>Communication services</i>	\$ 6,219,259	\$0	\$0	\$ 6,219,259

Short-term investments				
<i>Investment companies</i>	2,933,293	0	0	2,933,293
Total assets	\$136,599,369	\$0	\$0	\$136,599,369

Additional sector, industry or geographic detail, if any, is included in the Portfolio of Investments.

At December 31, 2023, the Fund did not have any transfers into/out of Level 3.

4. TRANSACTIONS WITH AFFILIATES

Management fee

Allspring Funds Management, a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., is the manager of the Fund and provides advisory and fund-level administrative services under an investment management agreement. Under the investment management agreement, Allspring Funds Management is responsible for, among other services, implementing the investment objectives and strategies of the Fund, supervising the subadviser and providing fund-level administrative services in connection with the Fund's operations. As compensation for its services under the investment management agreement, Allspring Funds Management is entitled to receive a management fee at the following annual rate based on the Fund's average daily net assets:

AVERAGE DAILY NET ASSETS	MANAGEMENT FEE
First \$500 million	0.750%
Next \$500 million	0.700
Next \$1 billion	0.650
Next \$2 billion	0.625
Next \$1 billion	0.600
Next \$5 billion	0.590
Over \$10 billion	0.580

For the year ended December 31, 2023, the management fee was equivalent to an annual rate of 0.75% of the Fund's average daily net assets.

Allspring Funds Management has retained the services of a subadviser to provide daily portfolio management to the Fund. The fee for subadvisory services is borne by Allspring Funds Management. Allspring Investments is the subadviser to the Fund and is entitled to receive a fee from Allspring Funds Management at an annual rate starting at 0.45% and declining to 0.35% as the average daily net assets of the Fund increase.

Administration fee

Under a class-level administration agreement, Allspring Funds Management provides class-level administrative services to the Fund, which includes paying fees and expenses for services provided by the transfer agent, sub-transfer agents, omnibus account servicers and record-keepers. As compensation for its services under the class-level administration agreement, Allspring Funds Management receives an annual fee of 0.08% which is calculated based on the average daily net assets of Class 2 shares.

Waivers and/or expense reimbursements

Allspring Funds Management has contractually committed through April 30, 2024 to waive fees and/or reimburse management and administration fees to the extent necessary to cap the Fund's expenses at 1.15% for Class 2 shares. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Distribution fee

The Trust has adopted a distribution plan for Class 2 shares pursuant to Rule 12b-1 under the 1940 Act. A distribution fee is charged to Class 2 shares and paid to Allspring Funds Distributor, LLC, the principal underwriter, an affiliate of Allspring Funds Management, at an annual rate up to 0.25% of the average daily net assets of Class 2 shares.

Interfund transactions

The Fund may purchase or sell portfolio investment securities to certain affiliates pursuant to Rule 17a-7 under the 1940 Act and under procedures adopted by the Board of Trustees. The procedures have been designed to ensure that these interfund transactions, which do not incur broker commissions, are effected at current market prices. Pursuant to these procedures, the Fund did not have any interfund transactions during the year ended December 31, 2023.

5. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the year ended December 31, 2023 were \$69,120,529 and \$83,863,914, respectively.

6. BANK BORROWINGS

The Trust, Allspring Master Trust and Allspring Funds Trust (excluding the money market funds) are parties to a \$350,000,000 revolving credit agreement whereby the Fund is permitted to use bank borrowings for temporary or emergency purposes, such as to fund shareholder redemption requests. Interest under the credit agreement is charged to the Fund based on borrowing rate equal to the higher of the Federal Funds rate or the overnight bank funding rate in effect on that day plus a spread. In addition, an annual commitment fee based on the unused balance is allocated to each participating fund.

For the year ended December 31, 2023, there were no borrowings by the Fund under the agreement.

7. DISTRIBUTIONS TO SHAREHOLDERS

The tax character of distributions paid was \$0 and \$51,108,273 of long-term capital gain for the years ended December 31, 2023 and December 31, 2022, respectively.

As of December 31, 2023, the components of distributable earnings on a tax basis were as follows:

UNREALIZED GAINS	CAPITAL LOSS CARRYFORWARD
\$18,286,308	\$(15,852,095)

8. CONCENTRATION RISKS

As of the end of the period, the Fund concentrated its portfolio of investments in industrials and information technology sector. A fund that invests a substantial portion of its assets in any sector may be more affected by changes in that sector than would be a fund whose investments are not heavily weighted in any sector.

9. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. The Fund has entered into a separate agreement with each Trustee that converts indemnification rights currently existing under the Fund's organizational documents into contractual rights that cannot be changed in the future without the consent of the Trustee. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

To the Shareholders of the Fund and Board of Trustees Allspring Variable Trust:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Allspring VT Discovery SMID Cap Growth Fund (formerly, Allspring VT Discovery Fund) (the Fund), one of the funds constituting Allspring Variable Trust, including the portfolio of investments, as of December 31, 2023, the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended, and the related notes (collectively, the financial statements) and the financial highlights for each of the years in the five-year period then ended. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Fund as of December 31, 2023, the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended, and the financial highlights for each of the years in the five-year period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Such procedures also included confirmation of securities owned as of December 31, 2023, by correspondence with the custodian and transfer agent. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. We believe that our audits provide a reasonable basis for our opinion.

KPMG LLP

We have not been able to determine the specific year that we began serving as the auditor of one or more Allspring Funds investment companies; however, we are aware that we have served as the auditor of one or more Allspring Funds investment companies since at least 1955.

Other information

Proxy voting information

A description of the policies and procedures used to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling **1-866-259-3305**, visiting our website at **allspringglobal.com**, or visiting the SEC website at sec.gov. Information regarding how the proxies related to portfolio securities were voted during the most recent 12-month period ended June 30 is available on the website at **allspringglobal.com** or by visiting the SEC website at sec.gov.

Quarterly portfolio holdings information

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Shareholders may view the filed Form N-PORT by visiting the SEC website at sec.gov.

Board of trustees and officers

Each of the Trustees and Officers listed in the table below acts in identical capacities for each fund in the Allspring family of funds, which consists of 117 mutual funds comprising the Allspring Funds Trust, Allspring Variable Trust, Allspring Master Trust and four closed-end funds (collectively the “Fund Complex”). This table should be read in conjunction with the Prospectus and the Statement of Additional Information[†]. The mailing address of each Trustee and Officer is 1415 Vantage Park Drive, 3rd Floor, Charlotte, NC 28203. Each Trustee and Officer serves an indefinite term, however, each Trustee serves such term until reaching the mandatory retirement age established by the Trustees.
