FRANKLIN U.S. GOVERNMENT SECURITIES VIP FUND

Investment Goal

Income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **The table and the example do not include any fees or sales charges imposed by variable insurance contracts, qualified retirement plans or funds of funds.** If they were included, your costs would be higher.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class 1	Class 2
Management fees	0.49%	0.49%
Distribution and service (12b-1) fees	None	0.25%
Other expenses ¹	0.02%	0.02%
Total annual Fund operating expenses	0.51%	0.76%

¹ Other expenses have been restated to reflect fees and expenses for the current fiscal year. Consequently, the total annual Fund operating expenses differ from the ratio of expenses to average net assets shown in the Financial Highlights.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of the period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class 1	\$52	\$163	\$284	\$639
Class 2	\$78	\$243	\$423	\$944

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 9.28% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets in U.S. government securities. The Fund invests primarily to predominantly in fixed rate and variable rate mortgage-backed securities, a significant to substantial amount of which is in securities issued by the Government National Mortgage Association (Ginnie Maes). Ginnie Maes represent an ownership interest in mortgage loans pooled together for sale to investors to finance purchases of homes. The mortgage loans may have either fixed or adjustable interest rates. As the underlying mortgage loans are paid off, Ginnie Maes provide investors with monthly payments of interest and principal as well as any unscheduled prepayments on the underlying mortgage loans.

Ginnie Maes carry a guarantee as to the timely repayment of principal and interest that is backed by the full faith and credit of the U.S. government. The full faith and credit guarantee does not apply to the market prices and yields of the Ginnie Maes or to the net asset value or performance of the Fund, which will vary with changes in interest rates and other market conditions.

The Fund may also invest in mortgage-backed and other securities issued or guaranteed by the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac). Securities issued or guaranteed by Fannie Mae and Freddie Mac are not backed by the full faith and credit of the U.S. government, but rather are generally supported only by the creditworthiness of the issuer.

The Fund may invest in U.S. Treasury STRIPS, bills, bonds, notes and Treasury inflation-protected securities.

Government agency or instrumentality issues have different levels of credit support. Ginnie Mae pass-through mortgage certificates are backed by the full faith and credit of the U.S. government. **U.S. government-sponsored entities, such as Fannie Mae and Freddie Mac, may be chartered by Acts of Congress, but their securities are neither issued nor guaranteed by the U.S. government. Although the U.S. government has provided financial support to Fannie Mae and Freddie Mac, no assurance can be given that the U.S. government will continue to do so.** Accordingly, securities issued by Fannie Mae and Freddie Mac may involve a greater risk of non-payment of principal and interest. Investors should remember that guarantees of timely repayment of principal and interest do not apply to the market prices and yields of the securities or to the net asset value or performance of the Fund, which will vary with changes in interest rates and other market conditions.

The Fund may also invest in other U.S. government securities, which may or may not be backed by the full faith and credit of the U.S. government.

Principal Risks

You could lose money by investing in the Fund. Mutual fund shares are not deposits or obligations of, or guaranteed or endorsed by, any bank, and are not insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other agency of the U.S. government.

Interest Rate When interest rates rise, debt security prices generally fall. The opposite is also generally true: debt security prices rise when interest rates fall. Interest rate changes are influenced by a number of factors, including government policy, monetary policy, inflation expectations, perceptions of risk, and supply of and demand for bonds. In general, securities with longer maturities or durations are more sensitive to interest rate changes.

Prepayment Prepayment risk occurs when a debt security can be repaid in whole or in part prior to the security's maturity and the Fund must reinvest the proceeds it receives, during periods of declining interest rates, in securities that pay a lower rate of interest. Also, if a security has been purchased at a premium, the value of the premium would be lost in the event of prepayment. Prepayments generally increase when interest rates fall.

Mortgage Securities Mortgage securities differ from conventional debt securities because principal is paid back periodically over the life of the security rather than at maturity. The Fund may receive unscheduled payments of principal due to voluntary prepayments, refinancings or foreclosures on the underlying mortgage loans. Because of prepayments, mortgage securities may be less effective than some other types of debt securities as a means of "locking in" long-term interest rates and may have less potential for capital appreciation during periods of falling interest rates. A reduction in the anticipated rate of principal prepayments, especially during periods of rising interest rates, may increase or extend the effective maturity of mortgage securities, making them more sensitive to interest rate changes, subject to greater price volatility, and more susceptible than some other debt securities to a decline in market value when interest rates rise.

Extension The market value of some debt securities (such as certain asset-backed and mortgage-backed securities) will be adversely affected when bond calls or prepayments on underlying mortgages or other assets are less or slower than anticipated. When that occurs, the effective maturity date of the Fund's investment is extended, resulting in an increase in interest rate sensitivity to that of a longer-term instrument.

Ginnie Maes Ginnie Maes differ from conventional corporate debt securities because principal is paid back monthly over the life of the security rather than at maturity. The Fund may receive unscheduled payments of principal

due to voluntary prepayments, refinancing or foreclosure on the underlying mortgage loans. Because of prepayments, Ginnie Maes may be less effective than some other types of securities as a means of "locking in" long-term interest rates and may have less potential for capital appreciation during periods of falling interest rates. A reduction in the anticipated rate of principal prepayments, especially during periods of rising interest rates, may increase the effective maturity of Ginnie Maes, making them more susceptible than some other debt securities to a decline in market value when interest rates rise.

Income The Fund's distributions to shareholders may decline when prevailing interest rates fall, when the Fund experiences defaults on debt securities it holds or when the Fund realizes a loss upon the sale of a debt security.

Credit An issuer of debt securities may fail to make interest payments or repay principal when due, in whole or in part. Changes in an issuer's financial strength or in a security's credit rating may affect a security's value. While securities issued by Ginnie Mae are backed by the full faith and credit of the U.S. government, not all securities of the various U.S. government agencies are, including those of Fannie Mae and Freddie Mac. Accordingly, securities issued by Fannie Mae and Freddie Mac may involve a risk of non-payment of principal and interest.

Management The Fund is subject to management risk because it is an actively managed investment portfolio. The Fund's investment manager applies investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired results.

Market The market values of securities or other investments owned by the Fund will go up or down, sometimes rapidly or unpredictably. The market value of a security or other investment may be reduced by market activity or other results of supply and demand unrelated to the issuer. This is a basic risk associated with all investments. When there are more sellers than buyers, prices tend to fall. Likewise, when there are more buyers than sellers, prices tend to rise.

The global outbreak of the novel strain of coronavirus, COVID-19 and its subsequent variants, has resulted in market closures and dislocations, extreme volatility, liquidity constraints and increased trading costs. The long-term impact on economies, markets, industries and individual issuers, is not known. Some sectors of the economy and individual issuers have experienced or may experience particularly large losses. Periods of extreme volatility in the financial markets; reduced liquidity of many instruments; and disruptions to supply chains, consumer demand and employee availability, may continue for some time.

Cybersecurity Cybersecurity incidents, both intentional and unintentional, may allow an unauthorized party to gain access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, cause the Fund, the investment manager, and/or their

service providers (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The investment manager has limited ability to prevent or mitigate cybersecurity incidents affecting third party service providers, and such third party service providers may have limited indemnification obligations to the Fund or the investment manager. Cybersecurity incidents may result in financial losses to the Fund and its shareholders, and substantial costs may be incurred in an effort to prevent or mitigate future cybersecurity incidents. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cybersecurity incidents.

Because technology is frequently changing, new ways to carry out cyber attacks are always developing. Therefore, there is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on the Fund's ability to plan for or respond to a cyber attack. Like other funds and business enterprises, the Fund, the investment manager, and their service providers are subject to the risk of cyber incidents occurring from time to time.

FUND SUMMARIES

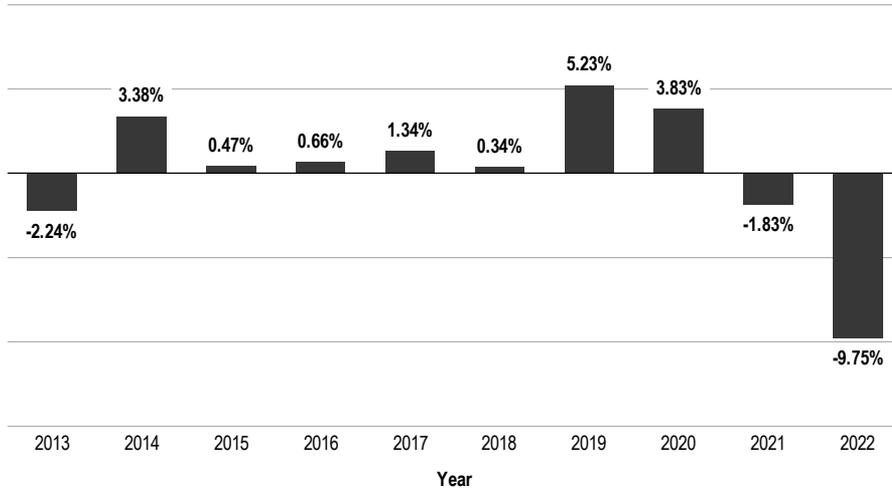

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year for Class 2 shares. The table shows how the Fund's average annual returns for 1 year, 5 years, 10 years or since inception, as applicable, compare with those of a broad measure of market performance. The Fund's past

performance is not necessarily an indication of how the Fund will perform in the future.

Performance reflects all Fund expenses but does not include any fees or sales charges imposed by variable insurance contracts, qualified plans or funds of funds. If they had been included, the returns shown below would be lower. Investors should consult the variable insurance contract prospectus, or the disclosure documents for qualified plans or funds of funds for more information.

Class 2 Annual Total Returns

Best Quarter:	2020, Q1	2.66%
Worst Quarter:	2022, Q3	-4.29%

As of March 31, 2023, the Fund's year-to-date return was 2.26%.

Average Annual Total Returns

For periods ended December 31, 2022

	1 Year	5 Years	10 Years
Franklin U.S. Government Securities VIP Fund - Class 1	-9.50%	-0.34%	0.31%
Franklin U.S. Government Securities VIP Fund - Class 2	-9.75%	-0.58%	0.06%
Bloomberg US Government - Intermediate Index (index reflects no deduction for fees, expenses or taxes)	-7.73%	0.46%	0.69%

Investment Manager

Franklin Advisers, Inc. (Advisers)

Portfolio Managers

Paul Varunok

Senior Vice President of Advisers and portfolio manager of the Fund since 2004.

Neil Dhruv

Vice President of Advisers and portfolio manager of the Fund since 2019.

Purchase and Sale of Fund Shares

Shares of the Fund are sold to insurance companies' separate accounts (Insurers) to fund variable annuity or variable life insurance contracts and to qualified plans. Insurance companies offer variable annuity and variable life insurance products through separate accounts. Shares of the Fund may also be sold to other mutual funds, either as underlying funds in a fund of funds or in other structures. In addition, Fund shares are held by a limited number of Insurers, qualified retirement plans and, when applicable, funds of funds. Substantial withdrawals by one or more Insurers, qualified retirement plans or funds of funds could reduce Fund assets, causing total Fund expenses to become higher than the numbers shown in the fees and expenses table above.

The terms of the offering of interests in separate accounts are included in the variable annuity or variable life insurance product prospectus. The terms of offerings of funds of funds are included in those funds' prospectuses. The terms of offering of qualified retirement plans are described in their disclosure documents. Investors should consult the variable contract prospectus, fund of fund prospectus, or plan disclosure documents for more information on fees and expenses imposed by variable insurance contracts, funds of funds or qualified retirement plans, respectively.

Taxes

Because shares of the Fund are generally purchased through variable annuity contracts or variable life insurance contracts, the Fund's distributions (which the Fund expects, based on its investment goals and strategies to consist of primarily ordinary income) will be exempt from current taxation if left to accumulate within the variable contract. You should refer to your contract prospectus for more information on these tax consequences.

Payments to Sponsoring Insurance Companies and Other Financial Intermediaries

The Fund or its distributor (and related companies) may pay broker/dealers or other financial intermediaries (such as banks and insurance companies, or their related companies) for the sale and retention of variable contracts which offer Fund shares and/or for other services. These payments may create a conflict of interest for an intermediary or be a factor in the insurance company's decision to include the Fund as an investment option in its variable contract. For more information, ask your insurance company or financial advisor, visit your insurance company's or intermediary's website, or consult the Contract prospectus or this Fund prospectus.

FRANKLIN TEMPLETON VARIABLE INSURANCE PRODUCTS TRUST

Overview

Franklin Templeton Variable Insurance Products Trust (the Trust) currently consists of multiple series (Funds), offering a wide variety of investment choices. Funds may be available in multiple classes: Class 1, Class 2, Class 4 and Class 5. The classes are identical except that Class 2, Class 4 and Class 5 each has a distribution plan (see "Share Classes" under Fund Account Information). The Funds are not offered to the public; they are offered and sold only to: (1) insurance company separate accounts to serve as the underlying investment vehicle for variable contracts; (2) certain qualified plans; and (3) other funds of funds.

Investment Considerations

- The following give a general sense of the level of fund assets associated with a particular investment or strategy: "small portion" (less than 10%); "portion" (10% to 25%); "significant" (25% to 50%); "substantial" (50% to 66%); "primary" (66% to 80%); and "predominant" (80% or more). The percentages are not limitations unless specifically stated as such in this prospectus or in the Trust's Statement of Additional Information (SAI).

federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other agency of the U.S. government. Fund shares involve investment risks, including the possible loss of principal.

- Because you could lose money by investing in a Fund, take the time to read each Fund description and consider all risks before investing.

Risks

- Fund shares are not deposits or obligations of, or guaranteed or endorsed by, any bank, and are not

Additional Information

More detailed information about each Fund, its investment policies, and its particular risks can be found in the SAI.

Investment Management

The Funds' investment managers and their affiliates manage as of February 28, 2023, \$1.42 trillion in assets, and have been in the investment management business since 1947.

(THIS PAGE INTENTIONALLY LEFT BLANK)

FRANKLIN U.S. GOVERNMENT SECURITIES VIP FUND

Investment Goal

The Fund's investment goal is income.

Principal Investment Policies and Practices

Under normal market conditions, the Fund invests at least 80% of its net assets in U.S. government securities. Shareholders will be given at least 60 days' advance notice of any change to this 80% policy. The Fund invests primarily to predominantly in fixed rate and variable rate mortgage-backed securities, a significant to substantial amount of which is in securities issued by the Government National Mortgage Association (Ginnie Maes).

Ginnie Maes represent an ownership interest in mortgage loans made by banks and other financial institutions to finance purchases of homes. The individual loans are packaged or "pooled" together for sale to investors. As the underlying mortgage loans are paid off, investors receive periodic principal and interest payments. Ginnie Maes carry a guarantee backed by the full faith and credit of the U.S. government. The guarantee applies only to the timely payment of principal and interest on the mortgages in the pool, and does not apply to the market prices and yields of the Ginnie Maes or to the net asset value or performance of the Fund, which will vary with changes in interest rates and other market conditions.

In addition to Ginnie Maes, the Fund may invest in mortgage-backed and other securities issued or guaranteed by the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac), or other U.S. government-sponsored entities. The Fund also may invest in U.S. government securities backed by other types of assets, including business loans guaranteed by the U.S. Small Business Administration, and obligations of the Tennessee Valley Authority (TVA). Finally, the Fund may invest in U.S. Treasury STRIPS, bonds, notes, bills and Treasury inflation-protected securities. The Fund may also invest in repurchase agreements, including those collateralized by U.S. government securities.

Government agency or instrumentality issues have different levels of credit support. Ginnie Mae pass-through mortgage certificates are backed by the full faith and credit of the U.S. government. **U.S. government-sponsored entities, such as Fannie Mae and Freddie Mac, may be chartered by Acts of Congress, but their securities are neither issued nor guaranteed by the U.S. government. Although the U.S. government has provided financial support to Fannie Mae and Freddie Mac, no assurance can be given that the U.S. government will continue to do so.** Accordingly, securities issued by Fannie Mae and Freddie Mac may involve a greater risk of non-payment of principal and interest. Investors should remember that guarantees of timely repayment of principal and interest do not apply to the market prices and yields of the securities or to the net asset

value or performance of the Fund, which will vary with changes in interest rates and other market conditions.

Payments to holders of mortgage-backed government securities, including Ginnie Maes, Fannie Maes and Freddie Macs, consist of the monthly distributions of interest and principal (less Ginnie Mae's, Fannie Mae's or Freddie Mac's fees and any applicable loan servicing fees). The Fund will reinvest the return of principal in securities that may have different interest rates than the securities on which the principal was returned.

Unscheduled principal payments are passed through to holders of mortgage-backed securities, such as the Fund, when mortgages in the pool underlying a Ginnie Mae, Fannie Mae or Freddie Mac mortgage-backed security are prepaid by borrowers (because a home is sold and the mortgage is paid off, or the mortgage is refinanced) or as a result of foreclosure. Accordingly, a mortgage-backed security's life is likely to be shorter than the stated maturity of the mortgages in the underlying pool. Because of such variation in prepayment rates, it is not possible to accurately predict the life of a particular mortgage-backed security.

A debt security obligates the issuer to the bondholders, both to repay a loan of money at a future date and generally to pay interest. Debt securities in which the Fund invests may be fixed-rate, adjustable-rate, a hybrid of the two, or zero coupon securities. Zero coupon securities are debt securities that make no periodic interest payments but instead are sold at substantial discounts from their value at maturity. The zero coupon bonds purchased by the Fund are typically those which are issued or created by the U.S. government or its agencies, where the interest coupons have been "stripped off" a bond and the rights to principal and interest payments are sold separately.

The Fund may acquire securities on a "when-issued," "delayed delivery" or "to-be-announced" basis. These transactions are arrangements under which the Fund buys securities that have been authorized but not yet issued, with payment for and delivery of the security scheduled for a future time.

In addition, the Fund may invest in mortgage dollar rolls. In a mortgage dollar roll, the Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type, coupon, and maturity) securities on a specified future date. During the period between the sale and repurchase, the Fund forgoes principal and interest paid on the mortgage-backed securities. The Fund earns money on a mortgage dollar roll from any difference between the sale price and the future purchase price, as well as the interest earned on the cash proceeds of the initial sale.

Portfolio Selection

FUND DETAILS

The investment manager generally buys, and holds, high quality income securities. Using this straightforward approach, the investment manager seeks to produce current income with a high degree of credit safety from a conservatively managed portfolio of U.S. government securities.

In making investment decisions, the investment manager may assess the potential impacts of applicable social and/or governance factors on an issuer, including with respect to lending practices. The investment manager may not always have the ability to consider such factors depending on the availability of appropriate investments for the Fund. When such factors are considered, these factors are only one component of the investment manager's assessment of eligible investments and may not be a determinative factor in the investment manager's final decision on whether to invest in an investment.

Exclusion of Investment Manager from Commodity Pool Operator Definition

With respect to the Fund, the investment manager has claimed an exclusion from the definition of "commodity pool operator" (CPO) under the Commodity Exchange Act (CEA) and the rules of the Commodity Futures Trading Commission (CFTC) and, therefore, is not subject to CFTC registration or regulation as a CPO. In addition, with respect to the Fund, the investment manager is relying upon a related exclusion from the definition of "commodity trading advisor" (CTA) under the CEA and the rules of the CFTC.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in commodity futures, commodity options and swaps, which in turn include non-deliverable currency forward contracts, as further described in the Fund's Statement of Additional Information (SAI). Because the investment manager and the Fund intend to comply with the terms of the CPO exclusion, the Fund may, in the future, need to adjust its investment strategies, consistent with its investment goal, to limit its investments in these types of instruments. The Fund is not intended as a vehicle for trading in the commodity futures, commodity options, or swaps markets. The CFTC has neither reviewed nor approved the investment manager's reliance on these exclusions, or the Fund, its investment strategies or this prospectus.

Temporary Investments

When the investment manager believes market or economic conditions are unfavorable for investors, the investment manager may invest up to 100% of the Fund's assets in a temporary defensive manner by holding all or a substantial portion of its assets in cash, cash equivalents or other high quality short-term investments. Temporary defensive investments generally may include short-term U.S. government securities, high grade commercial paper, bank obligations, repurchase agreements, money market fund shares (including shares of an affiliated money market fund), and other money market instruments. The investment manager also may invest in these types of securities or hold

cash while looking for suitable investment opportunities to maintain liquidity. In these circumstances, the Fund may be unable to achieve its investment goal.

Principal Risks

Interest Rate

Interest rate changes can be sudden and unpredictable, and are influenced by a number of factors, including government policy, monetary policy, inflation expectations, perceptions of risk, and supply of and demand for bonds. Changes in government or central bank policy, including changes in tax policy or changes in a central bank's implementation of specific policy goals, may have a substantial impact on interest rates. There can be no guarantee that any particular government or central bank policy will be continued, discontinued or changed, nor that any such policy will have the desired effect on interest rates. Debt securities generally tend to lose market value when interest rates rise and increase in value when interest rates fall. A rise in interest rates also has the potential to cause investors to rapidly sell fixed income securities. A substantial increase in interest rates may also have an adverse impact on the liquidity of a debt security, especially those with longer maturities or durations. Securities with longer maturities or durations or lower coupons or that make little (or no) interest payments before maturity tend to be more sensitive to interest rate changes.

Prepayment

Debt securities are subject to prepayment risk when the issuer can "call" the security, or repay principal, in whole or in part, prior to the security's maturity. When the Fund reinvests the prepayments of principal it receives, it may receive a rate of interest that is lower than the rate on the existing security, potentially lowering the Fund's income, yield and its distributions to shareholders. Securities subject to partial or complete prepayment(s) may offer less potential for gains during a declining interest rate environment and have greater price volatility. Prepayment risk is greater in periods of falling interest rates for fixed-rate investments, and for floating or variable rate securities, rising interest rates generally increase the risk of refinancings or prepayments.

Mortgage Securities

Mortgage securities differ from conventional debt securities because principal is paid back over the life of the security rather than at maturity. The Fund may receive unscheduled prepayments of principal due to voluntary prepayments, refinancing or foreclosure on the underlying mortgage loans. To the Fund this means a loss of anticipated interest, and a portion of its principal investment represented by any premium the Fund may have paid. Mortgage prepayments generally increase when interest rates fall. Because of prepayments, mortgage securities may be less effective than some other types of debt securities as a means of "locking in" long-term interest rates and may have less potential for capital appreciation during periods of falling interest rates.

When the Fund reinvests the prepayments of principal it receives, it may receive a rate of interest that is lower than the rate on the existing security.

Mortgage securities also are subject to extension risk. An unexpected rise in interest rates could reduce the rate of prepayments on mortgage securities and extend their life. This could cause the price of the mortgage securities and the Fund's share price to fall and would make the mortgage securities more sensitive to interest rate changes.

Since September 2008, the Federal Housing Finance Agency (FHFA), an agency of the U.S. government, has acted as the conservator to operate Fannie Mae and Freddie Mac until they are stabilized. It is unclear how long the conservatorship will last or what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac for the long-term.

Extension

The market value of some fixed rate debt securities (such as certain asset-backed and mortgage-backed securities) will be adversely affected when bond calls or prepayments on underlying mortgages or other assets are less or slower than anticipated, particularly when interest rates rise. When that occurs, the effective maturity date of the Fund's investment may be extended, resulting in an increase in interest rate sensitivity to that of a longer-term instrument. Such extension may also effectively lock-in a below market interest rate and reduce the value of the debt security.

Ginnie Maes

Ginnie Maes differ from conventional debt securities, such as Treasury securities, because principal is paid back monthly over the life of the security rather than at maturity. The Fund may receive unscheduled payments of principal due to voluntary prepayments, refinancing or foreclosure on the underlying mortgage loans. During periods of declining interest rates, the volume of principal prepayments generally increases as borrowers refinance their mortgages at lower rates. The Fund may be forced to reinvest returned principal at lower interest rates, reducing the Fund's income. For this reason, Ginnie Maes may be less effective than some other types of securities as a means of "locking in" long-term interest rates and may have less potential for capital appreciation during periods of falling interest rates than some other investments with similar maturities. A reduction in the anticipated rate of principal prepayments, especially during periods of rising interest rates, may increase the effective maturity of Ginnie Maes, making them more susceptible than some other debt securities to a decline in market value when interest rates rise. This could increase the volatility of the Fund's performance and share price.

Income

The Fund's distributions to shareholders may decline when prevailing interest rates fall, when the Fund experiences defaults on debt securities it holds or when the Fund realizes a loss upon the sale of a debt security. The Fund's income generally declines during periods of falling benchmark

interest rates because the Fund must reinvest the proceeds it receives from existing investments (upon their maturity, prepayment, amortization, sale, call, or buy-back) at a lower rate of interest or return.

Credit

The Fund could lose money on a debt security if the issuer or borrower is unable or fails to meet its obligations, including failing to make interest payments and/or to repay principal when due. Changes in an issuer's financial strength, the market's perception of the issuer's financial strength or an issuer's or security's credit rating, which reflects a third party's assessment of the credit risk presented by a particular issuer or security, may affect debt securities' values. The Fund may incur substantial losses on debt securities that are inaccurately perceived to present a different amount of credit risk by the market, the investment manager or the rating agencies than such securities actually do.

While securities issued or guaranteed by Ginnie Mae are backed by the full faith and credit of the U.S. government, not all securities of the various U.S. government agencies are, including those of Fannie Mae and Freddie Mac. While the U.S. government has provided financial support to Fannie Mae and Freddie Mac, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. Accordingly, securities issued by Fannie Mae and Freddie Mac may involve a risk of non-payment of principal and interest. Also, guarantees of principal and interest do not apply to market prices, yields or the Fund's share price. Any downgrade of the credit rating of the securities issued by the U.S. government may result in a downgrade of securities issued by its agencies or instrumentalities, including government-sponsored entities.

Management

The Fund is actively managed and could experience losses (realized and unrealized) if the investment manager's judgment about markets, interest rates or the attractiveness, relative values, liquidity, or potential appreciation of particular investments made for the Fund's portfolio prove to be incorrect. There can be no guarantee that these techniques or the investment manager's investment decisions will produce the desired results. Additionally, legislative, regulatory, or tax developments may affect the investment techniques available to the investment manager in connection with managing the Fund and may also adversely affect the ability of the Fund to achieve its investment goal.

Social and Governance Considerations Risk

Social and/or governance considerations are not the only factors considered by the investment manager and may not be a determinative factor in the investment manager's selection of securities for the Fund. In addition, the investment manager may not be able to give such considerations meaningful weight if the availability of

FUND DETAILS

appropriate securities for the Fund's portfolio is limited. The investment manager does not assess every investment for social and governance factors and, when it does, not every factor may be identified or evaluated. The investment manager's assessment of certain investments may differ from that of investors, third party service providers, such as ratings providers, or other funds. While the investment manager views social and governance considerations as having the potential to contribute to the Fund's performance, there is no guarantee that such results will be achieved.

Market

The market values of securities or other investments owned by the Fund will go up or down, sometimes rapidly or unpredictably. The Fund's investments may decline in value due to factors affecting individual issuers (such as the results of supply and demand), or sectors within the securities markets. The value of a security or other investment also may go up or down due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in interest rates or exchange rates, or adverse investor sentiment generally. Furthermore, events involving limited liquidity, defaults, non-performance or other adverse developments that affect one industry, such as the financial services industry, or concerns or rumors about any events of these kinds, have in the past and may in the future lead to market-wide liquidity problems, may spread to other industries, and could negatively affect the value and liquidity of the Fund's investments. In addition, unexpected events and their aftermaths, such as the spread of diseases; natural, environmental or man-made disasters; financial, political or social disruptions; terrorism and war; and other tragedies or catastrophes, can cause investor fear and panic, which can adversely affect the economies of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen. During a general downturn in the securities markets, multiple asset classes may decline in value. When markets perform well, there can be no assurance that securities or other investments held by the Fund will participate in or otherwise benefit from the advance.

The global outbreak of the novel strain of coronavirus, COVID-19 and its subsequent variants, has resulted in market closures and dislocations, extreme volatility, liquidity constraints and increased trading costs. The long-term impact on economies, markets, industries and individual issuers, are not known. Some sectors of the economy and individual issuers have experienced or may experience particularly large losses. Periods of extreme volatility in the financial markets; reduced liquidity of many instruments; and disruptions to supply chains, consumer demand and employee availability, may continue for some time. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, have taken extraordinary actions to support local and global economies and the financial markets in response to the COVID-19 pandemic. This and other government intervention into the

economy and financial markets may not work as intended, and have resulted in a large expansion of government deficits and debt, the long term consequences of which are not known. In addition, the COVID-19 pandemic, and measures taken to mitigate its effects, could result in disruptions to the services provided to the Fund by its service providers.

When-Issued and Delayed Delivery Transactions

Mortgage-backed securities may be issued on a when-issued or delayed delivery basis, where payment and delivery take place at a future date. Because the market price of the security may fluctuate during the time before payment and delivery, the Fund assumes the risk that the value of the security at delivery may be more or less than the purchase price.

Mortgage Dollar Rolls

In a mortgage dollar roll, the Fund takes the risk that the market price of the mortgage-backed securities will drop below their future purchase price. The Fund also takes the risk that the mortgage-backed securities that it repurchases at a later date will have less favorable market characteristics than the securities originally sold (e.g., greater prepayment risk). When the Fund uses a mortgage dollar roll, it is also subject to the risk that the other party to the agreement will not be able to perform. Mortgage dollar rolls add leverage to the Fund's portfolio and increase the Fund's sensitivity to interest rate changes. In addition, investment in mortgage dollar rolls will increase the Fund's portfolio turnover rate.

Liquidity

Liquidity risk exists when the markets for particular securities or types of securities or other investments are or become relatively illiquid so that the Fund is unable, or it becomes more difficult for the Fund, to sell the security or other investment at the price at which the Fund has valued the security. Illiquidity may result from political, economic or issuer specific events; supply/demand imbalances; changes in a specific market's size or structure, including the number of participants; or overall market disruptions. Securities or other investments with reduced liquidity or that become illiquid may involve greater risk than securities with more liquid markets. Market prices or quotations for illiquid securities may be volatile, and there may be large spreads between bid and ask prices. Reduced liquidity may have an adverse impact on market price and the Fund's ability to sell particular securities when necessary to meet the Fund's liquidity needs, which may arise or increase in response to a specific economic event or because the investment manager wishes to purchase particular investments or believes that a higher level of liquidity would be advantageous. An investment may become illiquid if the Fund and its affiliates receive material non-public information about the issuer or the investment. To the extent that the Fund and its affiliates hold a significant portion of an issuer's outstanding securities, the Fund may be subject to greater liquidity risk than if the issuer's securities were more widely held.

Cybersecurity

Cybersecurity incidents, both intentional and unintentional, may allow an unauthorized party to gain access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, cause the Fund, the investment manager, and/or their service providers (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The investment manager has limited ability to prevent or mitigate cybersecurity incidents affecting third party service providers, and such third party service providers may have limited indemnification obligations to the Fund or the investment manager. Cybersecurity incidents may result in financial losses to the Fund and its shareholders, and substantial costs may be incurred in an effort to prevent or mitigate future cybersecurity incidents. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cybersecurity incidents.

Because technology is frequently changing, new ways to carry out cyber attacks are always developing. Therefore, there is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on the Fund's ability to plan for or respond to a cyber attack. Like other funds and business enterprises, the Fund, the investment manager, and their service providers are subject to the risk of cyber incidents occurring from time to time.

More detailed information about the Fund and its policies and risks can be found in the Fund's SAI.

Management

Franklin Advisers, Inc. (Advisers), One Franklin Parkway, San Mateo, California 94403-1906, is the Fund's investment manager.

The Fund is managed by a team of dedicated professionals focused on investments in U.S. government securities. The portfolio managers of the Fund are as follows:

Paul Varunok Senior Vice President of Advisers

Mr. Varunok has been a portfolio manager of the Fund since 2004 and assumed the duties of co-lead portfolio manager in 2019. He joined Franklin Templeton in 2001.

Neil Dhruv Vice President of Advisers

Mr. Dhruv has been a co-lead portfolio manager of the Fund since 2019. He joined Franklin Templeton in 2002.

As co-lead portfolio managers of the Fund, Messrs. Varunok and Dhruv are jointly and primarily responsible for the day-to-day management of the Fund's portfolio. They have equal authority over all aspects of the Fund's investment portfolio, including, but not limited to, purchases and sales of individual securities, portfolio risk assessment, and the management of daily cash balances in accordance with

anticipated investment management requirements. The degree to which each portfolio manager may perform these functions, and the nature of these functions, may change from time to time.

The Fund's SAI provides additional information about portfolio manager compensation, other accounts that they manage and their ownership of Fund shares.

The Fund pays Advisers a fee for managing the Fund's assets.

Advisers has agreed to reduce its fees to reflect reduced services resulting from the Fund's investments in Franklin Templeton affiliated funds.

For the fiscal year ended December 31, 2022, the Fund paid Advisers an effective management fee of 0.49% of the Fund's average net assets for investment management services.

A discussion regarding the basis for the board of trustees' approval of the Fund's investment management agreement is available in the Fund's semiannual report for the period ended June 30, 2022.

Manager of Managers Structure

The investment manager and the Trust have received an exemptive order from the SEC that allows the Fund to operate in a "manager of managers" structure whereby the investment manager can appoint and replace both wholly-owned and unaffiliated sub-advisors, and enter into, amend and terminate sub-advisory agreements with such sub-advisors, each subject to board approval but without obtaining prior shareholder approval (Manager of Managers Structure). The Fund will, however, inform shareholders of the hiring of any new sub-advisor within 90 days after the hiring. The SEC exemptive order provides the Fund with greater flexibility and efficiency and alleviates the need for the Fund to incur the expense and delays associated with obtaining shareholder approval of such sub-advisory agreements.

The use of the Manager of Managers Structure with respect to the Fund is subject to certain conditions that are set forth in the SEC exemptive order. Under the Manager of Managers Structure, the investment manager has the ultimate responsibility, subject to oversight by the Fund's board of trustees, to oversee sub-advisors and recommend their hiring, termination and replacement. The investment manager will also, subject to the review and approval of the Fund's board of trustees: set the Fund's overall investment strategy; evaluate, select and recommend sub-advisors to manage all or a portion of the Fund's assets; and implement procedures reasonably designed to ensure that each sub-advisor complies with the Fund's investment goal, policies and restrictions. Subject to review by the Fund's board of trustees, the investment manager will allocate and, when appropriate, reallocate the Fund's assets among sub-advisors and monitor and evaluate the sub-advisors' performance.

FUND DETAILS

Financial Highlights

This table presents the financial performance of Fund shares for the past five years or since inception. The table shows certain information on a single Fund share basis (per share performance). It also shows some key Fund statistics, such as total return (past performance) and expense ratios. Total return represents the annual change in value of a share assuming reinvestment of dividends and capital gains. This information has been audited by PricewaterhouseCoopers LLP. Their report, along with the Fund's financial statements, is included in the annual report, which is available upon request.

Franklin U.S. Government Securities VIP Fund - Class 1

	Year Ended December 31,				
	2022	2021	2020	2019	2018
Per share operating performance (for a share outstanding throughout the year)					
Net asset value, beginning of year	\$11.85	\$12.37	\$12.34	\$12.07	\$12.36
Income from investment operations ^a :					
Net investment income ^b	0.20	0.12	0.22	0.27	0.29
Net realized and unrealized gains (losses)	(1.32)	(0.32)	0.28	0.38	(0.22)
Total from investment operations	(1.12)	(0.20)	0.50	0.65	0.07
Less distributions from:					
Net investment income	(0.29)	(0.32)	(0.47)	(0.38)	(0.36)
Net asset value, end of year	\$10.44	\$11.85	\$12.37	\$12.34	\$12.07
Total return ^c	(9.50)%	(1.62)%	4.08%	5.47%	0.60%
Ratios to average net assets					
Expenses ^d	0.49%	0.53%	0.53%	0.51%	0.50%
Net investment income	1.79%	1.03%	1.81%	2.23%	2.38%
Supplemental data					
Net assets, end of year (000's)	\$37,066	\$45,733	\$52,307	\$54,104	\$59,213
Portfolio turnover rate	9.28%	80.81%	56.32%	24.16%	22.25%

a. The amount shown for a share outstanding throughout the period may not correlate with the Statement of Operations in the annual report for the period due to the timing of sales and repurchases of the Fund's shares in relation to income earned and/or fluctuating fair value of the investments of the Fund.

b. Based on average daily shares outstanding.

c. Total return does not include fees, charges or expenses imposed by the variable annuity and life insurance contracts for which Franklin Templeton Variable Insurance Products Trust serves as an underlying investment vehicle.

d. Benefit of expense reduction rounds to less than 0.01%.

Franklin U.S. Government Securities VIP Fund - Class 2

	Year Ended December 31,				
	2022	2021	2020	2019	2018
Per share operating performance (for a share outstanding throughout the year)

Additional Information, All Funds

Dealer Compensation

Franklin Distributors, LLC (Distributors) and/or its affiliates may provide financial support to insurance companies that use the Funds as underlying investment options for their variable contracts, securities dealers that sell shares of Franklin Templeton funds, or participate in the offering of variable insurance products that invest in the Trust (VIP Qualifying Dealers) or other financial intermediaries (together, the intermediaries). Such financial support may be made by payments from Distributors' and/or its affiliates' resources, including from Distributors' retention of underwriting concessions and, in the case of Rule 12b-1 share classes, from payments to Distributors under such plans.

Distributors makes these payments to intermediaries for the provision of services to contract holders, or for marketing support in connection with efforts to educate financial advisors or for the provision of other services which may facilitate, directly or indirectly, investment in the Funds. A number of factors will be considered in determining payments, including an intermediary's sales, assets and redemption rates, the nature and quality of any servicing provided to the Funds, and the quality of an intermediary's relationship with Distributors. Distributors will, on an annual basis, determine the advisability of continuing these payments. To the extent permitted by SEC and FINRA rules and other applicable laws and regulations, Distributors and/or its affiliates may pay or allow other promotional incentives or payments to dealers. Sale of shares of the Funds, as well as shares of other Franklin Templeton funds, is not considered a factor in the selection of securities dealers to execute the Funds' portfolio transactions. Accordingly, the allocation of portfolio transactions for execution by VIP Qualifying Dealers is not considered marketing support payments.

You can find further details in the SAI about the payments made by Distributors and/or its affiliates and the services provided by your insurance company, VIP Qualifying Dealer or other financial intermediary. While your insurance company's fees and charges are generally disclosed in the insurance contract prospectus, your VIP Qualifying Dealer may charge you additional fees or commissions other than those disclosed in this prospectus. You can ask your insurance company, VIP Qualifying Dealer or other financial intermediary for information about any payments they receive from Distributors and/or its affiliates and any services they provide, as well as about fees and/or commissions they charge. These payments and other fees and charges are not reflected in the fee table included in this prospectus. Additional disclosure may be included in the insurance contract prospectus.

Portfolio Holdings

A description of the Trust's policies and procedures regarding the release of portfolio holdings information for each Fund of the Trust (collectively, the "Fund") is also available in the Trust's SAI. Portfolio holdings information can be viewed online at franklintempleton.com.

Statements and Reports

Contract Owners should receive financial reports for the Fund related to their Contract from the sponsoring Insurer every six months.

Administrative Services

Franklin Templeton Services, LLC (FT Services) has an agreement with the investment managers to provide certain administrative services and facilities for each Fund.

FT Services or an affiliate, on behalf of itself and other affiliates of the managers, makes certain payments to insurance companies out of its own resources for certain services provided to the Funds by insurance companies relating to their investment in the Funds on behalf of variable contract owners. See "Dealer Compensation" or the SAI for more information.

Distributions and Taxes

Income and Capital Gains Distributions

As a regulated investment company, each Fund generally pays no federal income tax on the income and gains it distributes to its shareholders. Each Fund (sometimes referred to as "the Fund") intends to pay income dividends at least annually from its net investment income. Capital gains, if any, may be paid at least annually. The Fund may distribute income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either income dividends or capital gain distributions.

Tax Considerations

The Trust consists of multiple Funds each of which for federal income tax purposes is treated separately from any other. Each Fund expects to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). Accordingly, the assets, income and distributions of the Fund are considered separately for purposes of determining whether the Fund qualifies as a regulated investment company. If the Fund so qualifies, it will not be subject to federal income tax on the portion of its income and gains that it distributes to shareholders. Additionally, each Fund

intends to comply with the diversification requirements imposed by Section 817(h) of the Code.

For federal income tax purposes, the insurance companies and their separate accounts are treated as the owners of the shares of the Fund selected as an investment option rather than the purchasers of a variable annuity contract or variable life insurance policy (variable contracts). In light of the tax-favored status of life insurance company separate accounts, there should be no adverse federal income tax consequences to them as a result of their buying, holding, exchanging or selling Fund shares or on their receipt of Fund distributions, subject to applicable limitations under the Code.

Insurance companies offer variable annuity and variable life insurance products to investors including pension plans (Contracts), through separate accounts (Insurers). When shares of the Fund are investment options of Contracts, separate accounts, and not the owners of the Contracts including group contract and pension plan certificate holders (Contract Owners), are generally the shareholders of the Fund. As a result, it is anticipated that any income dividends or capital gains distributions paid by the Fund will be exempt from current taxation to the purchaser of such variable contracts if left to accumulate within a variable contract. Withdrawals from such contracts may be subject to ordinary income tax and, if such withdrawals are made before age 59 ½, a 10% penalty tax. For more information on taxes, please refer to the accompanying prospectus of the annuity or life insurance program through which shares of the Fund are underlying investment options.

Other tax information. This discussion of "Distributions and Taxes" is for general information only and is not tax advice. You should consult your own tax advisor regarding your particular circumstances and about any federal, state or local tax consequences before making an investment in a variable contract or the Fund.

Fund Account Information

Buying Shares

Insurance companies offer variable annuity and variable life insurance products to investors including pension plans (Contracts), through separate accounts (Insurers). When shares of the Fund are investment options of Contracts, separate accounts, and not the owners of the Contracts including group contract and pension plan certificate holders (Contract Owners), are generally the shareholders of the Fund. Shares of the Fund may also be purchased by other mutual funds (funds of funds).

Shares of the Fund are sold at net asset value (NAV). When sold in connection with Contracts, the Fund corresponds with the investment options offered by the Insurer to Contract Owners. The board of trustees monitors the Fund for the existence of any material irreconcilable conflicts of interest between different types of their separate account

investors. If there were any such conflicts, the board of trustees will determine what action, if any, shall be taken in response. Please refer to the accompanying contract prospectus for information on how to select the Fund as an investment option.

Contract Owners' payments will be allocated by the insurance company separate account to sub-accounts that purchase shares of the Fund corresponding with the sub-account chosen by the Contract Owner, and are subject to any limits or conditions in the contract. Requests to buy shares are processed at the NAV next calculated after we or our designees receive the request in proper form. Please refer to your Contract prospectus or other disclosure document for further information. The Fund does not issue share certificates.

Selling Shares

An Insurer that holds shares of the Fund in connection with a Contract sells shares of the Fund to make benefit or surrender payments or to execute exchanges (transfers) between investment options under the terms of the Contract.

Exchanging Shares

Contract Owners may exchange interests in sub-accounts of an insurance company separate account that corresponds with shares of any one class or Fund, for interests in sub-accounts that correspond with shares of other classes or Funds, subject to the terms and any specific limitations on the exchange (or "transfer") privilege described in the Contract prospectus.

Frequent exchanges or excessive trading can harm performance and interfere with Fund portfolio management or operations and increase Fund costs. The Funds discourage short-term or excessive trading and may seek to restrict or reject such trading (please see "Fund Account Information - Frequent Trading Policy," below).

Frequent Trading Policy

The board of trustees has adopted the following policies and procedures with respect to frequent trading (Frequent Trading Policy):

Frequent trading generally. The Fund discourages and does not intend to accommodate short-term or frequent purchases and redemptions of fund shares, often referred to as "frequent trading," and asks its Fund of Fund investors and participating Insurers for their cooperation in trying to discourage such activity in their separate accounts by Contract Owners and their financial advisors. The Fund intends to seek to restrict or reject such trading or take other action, as described below, if in the judgment of the Fund manager or transfer agent such trading may interfere with the efficient management of the Fund's portfolio, may materially increase the Fund's transaction costs, administrative costs or taxes, or may otherwise be detrimental to the interests of the Fund and its shareholders.

Frequent trading consequences. If information regarding trading activity in the Fund or in any other Franklin

Templeton fund or non-Franklin Templeton fund is brought to the attention of the Fund's investment manager or transfer agent and based on that information the Fund or its investment manager or transfer agent in their sole discretion conclude that such trading may be detrimental to the Fund as described in this Frequent Trading Policy, the Fund may temporarily or permanently bar future purchases into the Fund or, alternatively, may limit the amount, number or frequency of any future purchases and/or the method by which an Insurer or a Fund of Funds may request future purchases and redemptions (including purchases and/or redemptions by an exchange or transfer between the Fund and any other mutual fund). In determining what actions should be taken, the Fund's transfer agent may consider a variety of factors, including the potential impact of such remedial actions on the Fund or its shareholders. If the Fund is a "fund of funds," the Fund's transfer agent may take into account the impact of the trading activity and of any proposed remedial action on both the Fund and the underlying funds in which the Fund invests.

In considering trading activity, the Fund may consider, among other factors, trading history both directly and, if known, through financial intermediaries, in the Fund, in other Franklin Templeton funds, in non-Franklin Templeton mutual funds, or in accounts under common control or ownership.

Frequent trading through Insurers. As a Contract Owner you are also subject to this policy. An Insurer's order for purchases and/or redemptions pursuant to a Contract Owner's instructions (including purchases and/or redemptions by an exchange or transfer between the Fund and any mutual fund) are submitted pursuant to aggregated orders (Aggregated Orders). A fund of fund's order for purchases and/or redemptions pursuant to its investors' instructions are also submitted pursuant to Aggregated Orders. While the Fund will encourage Insurers and funds of funds to apply the Fund's Frequent Trading Policy to their investors, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Frequent Trading Policy because Insurers and funds of funds have the relationships with, and are responsible for maintaining the account records of, the individual investors. For example, should it occur, the Fund may not be able to detect frequent trading that may be facilitated by financial intermediaries or made difficult to identify in the Aggregated Orders used by Insurers and Fund of Fund investors.

Therefore, the Fund or its agent selectively monitor the Aggregated Orders used by Insurers and Fund of Fund investors for purchases, exchanges and redemptions in respect of all their investors and seek the cooperation of Insurers and Fund of Fund investors to apply the Fund's Frequent Trading Policy. There may be legal and technological limitations on the ability of an Insurer or Fund of Fund to impose trading restrictions and to apply the Fund's Frequent Trading Policy to their investors through such methods as implementing short-term trading limitations or restrictions, assessing the Fund's redemption fee (if applicable) and monitoring trading activity for what might be frequent trading. As a result, the Fund may not be able to

determine whether trading by Insurers or funds of funds in respect of their investors is contrary to the Fund's Frequent Trading Policy.

Risks from frequent trading. Depending on various factors, including the size of the Fund, the amount of assets the portfolio manager typically maintains in cash or cash equivalents and the dollar amount and number and frequency of trades and the types of securities in which the Fund typically invests, short-term or frequent trading may interfere with the efficient management of the Fund's portfolio, increase the Fund's transaction costs, administrative costs and taxes and/or impact Fund performance.

In addition, if the nature of the Fund's portfolio holdings exposes the Fund to "arbitrage market timers," the value of the Fund's shares may be diluted if redeeming shareholders receive proceeds (and buying shareholders receive shares) based upon net asset values which do not reflect appropriate fair value prices. Arbitrage market timing occurs when an investor seeks to take advantage of the possible delay between the change in the value of a mutual fund's portfolio holdings and the reflection of the change in the fund's net asset value per share. A fund that invests significantly in foreign securities may be particularly vulnerable to arbitrage market timing. Arbitrage market timing in foreign investments may occur because of time zone differences between the foreign markets on which the Fund's international portfolio securities trade and the time as of which the Fund's NAV is calculated. Arbitrage market timers may purchase shares of the Fund based on events occurring after foreign market closing prices are established, but before calculation of the Fund's NAV. One of the objectives of the Trust's fair value pricing procedures is to minimize the possibilities of this type of arbitrage market timing (please see "Fund Account Information - Valuation - Foreign Securities – Potential Impact of Time Zones and Market Holidays").

Since the Fund may invest significantly in securities that are, or may be, restricted, unlisted, traded infrequently, thinly traded, or relatively illiquid (relatively illiquid securities), the Fund may be particularly vulnerable to arbitrage market timing. An arbitrage market timer may seek to take advantage of a possible differential between the last available market prices for one or more of these relatively illiquid securities that are used to calculate the Fund's net asset value and the latest indications of market values for those securities. One of the objectives of the Fund's fair value pricing procedures is to minimize the possibilities of this type of arbitrage market timing (please see "Fund Account Information - Fair Valuation – Individual Securities" under the heading "Fund Account Policies", below).

The Fund is currently using several methods to reduce the risk of frequent trading. These methods include:

- seeking the cooperation of Insurers and funds of funds to assist the Fund in identifying potential frequent trading activity;

ADDITIONAL INFORMATION, ALL FUNDS

- committing staff to selectively review on a continuing basis recent trading activity in order to identify trading activity that may be contrary to the Fund's Frequent Trading Policy;
- monitoring potential price differentials following the close of trading in foreign markets to determine whether the application of fair value pricing procedures is warranted; and
- seeking the cooperation of financial intermediaries to assist the Fund in identifying frequent trading activity.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders. There is no assurance that the Fund or its agents will gain access to any or all information necessary to detect frequent trading in Insurers' separate accounts. While the Fund will seek to take actions (directly and with the assistance of Insurers) that will detect frequent trading, it cannot represent that such trading activity can be minimized or completely eliminated.

Revocation of frequent trading trades. Transactions placed in violation of a Fund's Frequent Trading Policy or exchange limit guidelines are not necessarily deemed accepted by the Fund and may be cancelled or revoked by the Fund, in full or in part, as soon as practicable following receipt by the Fund and prompt inquiry of the intermediary.

Involuntary Redemptions

The Fund reserves the right to close an account (and involuntarily redeem any investment) if it is deemed to have engaged in activities that are illegal (such as late trading) or otherwise believed to be detrimental to the Fund (such as frequent trading), to the fullest extent permitted by law and consistent with the best interests of the Fund and its shareholders. Thus, for example, if upon inquiry the Fund and insurance company identify a contract owner that has engaged in late trading or frequent trading activities, the Fund may advise the insurance company that it will not accept future investments, or is redeeming any investment related to that contract owner. Involuntary redemptions may be in cash or in kind.

Fund Account Policies

CALCULATING SHARE PRICE

When they buy and sell shares, the Fund's shareholders pay and receive the net asset value (NAV) per share.

The value of a mutual fund is determined by deducting the fund's liabilities from the total assets of the portfolio. The NAV per share of a class of the Fund is determined by dividing the net asset value of the Fund's share class by the applicable number of shares outstanding of that share class. The Fund's NAV does not include any fee or sales charge imposed by variable insurance contracts for which the Fund is an investment option or funds of funds that purchase shares of the Fund. Investors should consult the contract

prospectus, disclosure document or Fund of Funds prospectus for more information.

The Fund calculates the NAV per share each business day as of 1 p.m. Pacific time or the regularly scheduled close of the New York Stock Exchange (NYSE), whichever is earlier. The Fund does not calculate the NAV on days the NYSE is closed for trading, which include New Year's Day, Martin Luther King Jr. Day, President's Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. If the NYSE has a scheduled early close, the Fund's share price would be determined as of the time of the close of the NYSE. If, due to weather or other special or unexpected circumstances, the NYSE has an unscheduled early close on a day that it has opened for business, the Fund reserves the right to consider that day as a regular business day and accept purchase and redemption orders and calculate its share price as of the normally scheduled close of regular trading on the NYSE.

When determining the NAV, the Fund values cash and receivables at their realizable amounts, and records interest as accrued and dividends on the ex-dividend date. The Fund generally utilizes two independent pricing services to assist in determining a current market value for each security. If market quotations are readily available for portfolio securities listed on a securities exchange (including exchange-traded funds), the Fund values those securities at the last quoted sale price or the official closing price of the day, respectively, or, if there is no reported sale, within the range of the most recent quoted bid and ask prices. The Fund values over-the-counter portfolio securities within the range of the most recent bid and ask prices. If portfolio securities trade both in the over-the-counter market and on a stock exchange, the Fund values them according to the broadest and most representative market. Prices received by the Fund for securities may be based on institutional "round lot" sizes, but the Fund may hold smaller, "odd lot" sizes. Odd lots may trade at lower prices than round lots.

Generally, trading in corporate bonds, U.S. government securities and money market instruments is substantially completed each day at various times before 1 p.m. Pacific time. The value of these securities used in computing the NAV is determined as of such times. Occasionally, events affecting the values of these securities may occur between the times at which they are determined and 1:00 p.m. Pacific time that will not be reflected in the computation of the NAV. The Fund relies on third party pricing vendors to provide evaluated prices that reflect current fair market value at 1 p.m. Pacific time.

To the extent that a Fund is invested in one or more open-end investment management companies (mutual funds), the Fund values shares of a mutual fund at the mutual fund's last determined NAV.

FAIR VALUATION - INDIVIDUAL SECURITIES

Since the Fund may invest in securities that are restricted, unlisted, traded infrequently, thinly traded, or relatively

illiquid, there is the possibility of a differential between the last available market prices for one or more of those securities and the latest indications of market values for those securities. The Fund has procedures, approved by the board of trustees, to determine the fair value of individual securities and other assets for which market prices are not readily available (such as certain restricted or unlisted securities and private placements) or which may not be reliably priced (such as in the case of trade suspensions or halts, price movement limits set by certain foreign markets, and thinly traded or illiquid securities). Some methods for valuing these securities may include: fundamental analysis (earnings multiple, etc.), matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. The board of trustees oversees the application of fair value pricing procedures.

The application of fair value pricing procedures represents a good faith determination based upon specifically applied procedures. There can be no assurance that the Funds could obtain the fair value assigned to a security if they were able to sell the security at approximately the time at which a Fund determines its NAV per share.

SECURITY VALUATION - U.S. PASS-THROUGH SECURITIES, CMO, ABS, MBS

Mortgage pass-through securities (such as Ginnie Mae, Fannie Mae and Freddie Mac), other mortgage-backed securities (MBS), collateralized mortgage obligations (CMOs) and asset-backed securities (ABS), generally trade in the over-the-counter market rather than on a securities exchange. The Fund may value these portfolio securities by utilizing quotations from bond dealers, information with respect to bond and note transactions and may rely on independent pricing services. The Fund's pricing services use valuation models or matrix pricing to determine current value. In general, they use information with respect to comparable bond and note transactions, quotations from bond dealers or by reference to other securities that are considered comparable in such characteristics as rating, interest rate, maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves. Matrix pricing is considered a form of fair value pricing.

SECURITY VALUATION - CORPORATE DEBT SECURITIES

Corporate debt securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may value these portfolio securities by utilizing quotations from bond dealers, information with respect to bond and note transactions and may rely on independent pricing services to assist in determining a current market value for each security. The Fund's pricing services uses independent quotations from bond dealers and bond market activity to determine current value.

SECURITY VALUATION - SENIOR SECURED CORPORATE LOANS

Senior secured corporate loans with floating or variable interest rates generally trade in the over-the-counter market rather than on a securities exchange. The Fund may value these portfolio securities by utilizing quotations from loan dealers and other financial institutions, information with respect to bond and note transactions and may rely on independent pricing services to assist in determining a current market value for each security. These pricing services may utilize independent market quotations from loan dealers or financial institutions and may incorporate valuation methodologies that incorporate multiple bond characteristics. These characteristics may include dealer quotes, issuer type, coupon, maturity, weighted average maturity, interest rate spreads and yield curves, cash flow and credit risk/quality analysis.

SECURITY VALUATION – MUNICIPAL SECURITIES – MATRIX PRICING (FAIR VALUATION)

Municipal securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund's pricing services use valuation models or matrix pricing to determine current value. In general, they use information with respect to comparable bond and note transactions, quotations from bond dealers or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date. Matrix pricing is considered a form of fair value pricing.

SECURITY VALUATION - OPTIONS

The Fund values traded call options at their market price as determined above. The current market value of any option the Fund holds is its last sale price on the relevant exchange before the Fund values its assets. If there are no sales that day or if the last sale price is outside the bid and ask prices, the Fund values options within the range of the current closing bid and ask prices if the Fund believes the valuation fairly reflects the contract's market value.

VALUATION - FOREIGN SECURITIES - COMPUTATION OF U.S. EQUIVALENT VALUE

The Fund generally determines the value of a foreign security as of the close of trading on the foreign stock exchange on which the security is primarily traded, or as of 1 p.m. Pacific time, if earlier. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 1 p.m. Pacific time on the day that the value of the foreign security is determined. If no sale is reported at that time, the foreign security will be valued within the range of the most recent quoted bid and ask prices. Occasionally events (such as repatriation limits or restrictions) may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the board of trustees.

VALUATION – FOREIGN SECURITIES – POTENTIAL IMPACT OF TIME ZONES AND MARKET HOLIDAYS

Trading in securities on foreign securities stock exchanges and over-the-counter markets, such as those in Europe and Asia, may be completed before 1 p.m. Pacific time on each day that the Fund is open. Occasionally, events occur between the time at which trading in a foreign security is completed and 1 p.m. Pacific time that might call into question the availability (including the reliability) of the value of a foreign portfolio security held by the Fund. As a result, the Fund may be susceptible to what is referred to as “time-zone arbitrage.” Certain investors in the Fund may seek to take advantage of discrepancies in the value of the Fund’s portfolio securities as determined by the foreign market at its close and the latest indications of value attributable to the portfolio securities at the time the Fund’s NAV is computed. Trading by these investors, often referred to as “arbitrage market timers,” may dilute the value of the Fund’s shares, if such discrepancies in security values actually exist. To attempt to minimize the possibilities for time-zone arbitrage, and in accordance with procedures established and approved by the Fund’s board of trustees, the investment manager monitors price movements by using a fair value pricing service offered through an independent pricing vendor.

The fair value pricing service is used to estimate the price of a security in a liquid market at the time of the NAV calculation (1 p.m. Pacific Time). If certain criteria are met, the foreign securities may be valued using the price from the fair value pricing services. The intended effect of applying fair value pricing is to compute an NAV that accurately reflects the value of the Fund’s portfolio at the time that the NAV is calculated, to discourage potential arbitrage market timing in Fund shares, to mitigate the dilutive impact of such attempted arbitrage market timing and to be fair to purchasing, redeeming and existing shareholders. However, the application of fair value pricing procedures may, on occasion, worsen rather than mitigate the potential dilutive impact of shareholder trading.

In addition, trading in foreign portfolio securities generally, or in securities markets in a particular country or countries, may not take place on every Fund’s business day. Furthermore, trading takes place in various foreign markets on days that are not business days for the Funds, and on which the Fund’s NAV is not calculated (in which case, the NAV of the Fund’s shares may change on days when shareholders will not be able to purchase or redeem Fund shares). Thus, the calculation of the Fund’s NAV does not take place contemporaneously with the determination of the prices of many of the foreign portfolio securities used in the calculation. If events affecting the last determined values of these foreign securities occur, the securities will be valued at fair value determined in good faith in accordance with the Fund’s fair value procedures established and approved by the board of trustees (as described above).

SHARE CLASSES

Class 1, Class 2, Class 4 and Class 5 shares of the Funds are identical except that Class 2, Class 4 and Class 5 each have a distribution plan or "rule 12b-1" plan, as described below.

Subject to applicable law, the board of trustees may from time to time, without the approval, vote or consent of shareholders of the Fund or any class, combine, merge or otherwise consolidate the shares of two or more classes of shares of the Fund with and/or into a single class of shares of the Fund, with such designation, preference, conversion or other rights, voting powers, restrictions, limitations as to dividends, qualifications, terms and conditions of redemption and other characteristics as the board of trustees may determine. Such transactions may be effected through share-for-share exchanges, transfers or sales of assets, shareholder in-kind redemptions and purchases, exchange offers, or any other method approved by the board of trustees.

Distribution and service (12b-1) fees Class 2, Class 4 and Class 5 each have a distribution plan, sometimes known as a rule 12b-1 plan, that allows the Fund to pay distribution fees to those who sell and distribute Class 2, Class 4 or Class 5 shares, as applicable, and provide services to shareholders and Contract Owners. Because these fees are paid out of Class 2’s, Class 4’s and Class 5’s assets on an on-going basis, over time these fees will increase the cost of an investment, and may cost you more than paying other types of sales charges. While the maximum amount payable under most Funds’ Class 2 rule 12b-1 plan is 0.35% per year of the Fund’s Class 2 average daily net assets, the board of trustees has set the current rate at 0.25%. However, Franklin Strategic Income VIP Fund, Templeton Developing Markets VIP Fund, Templeton Foreign VIP Fund and Templeton Global Bond VIP Fund each have a maximum rule 12b-1 plan fee of 0.25% per year. The maximum amount payable under each applicable Fund’s Class 4 rule 12b-1 plan is 0.35% per year of the Fund’s Class 4 average daily net assets. The maximum amount payable under the Franklin VolSmart Allocation VIP Fund’s Class 5 rule 12b-1 plan is 0.15% per year of the Fund’s Class 5 average daily net assets. A portion of the fees payable to Franklin Distributors, LLC (Distributors) or others under the rule 12b-1 plan may be retained by Distributors for distribution expenses.

REDEMPTIONS

Typically, the Fund uses cash and cash equivalents held in its portfolio or sells portfolio assets to meet all redemption needs. In unusual circumstances or under stressed market conditions, the Fund may use other methods to meet redemptions, such as the use of lines of credit or interfund lending in reliance on exemptive relief from the SEC.

ADDITIONAL POLICIES

Please note that the Fund maintains additional policies and reserves certain rights, including:

- The Fund may restrict, reject or cancel any purchase orders, including an exchange request.

- Typically, redemptions are processed by the next business day provided the redemption request is received in proper form and good order, but may take up to seven days to be processed if making immediate payment would adversely affect the Fund or there is another cause for delay (for example, if you sell shares recently purchased, proceeds may be delayed until your check, draft or wire/electronic funds transfer has cleared). In certain circumstances, however, the Fund may not have the ability to delay a redemption request or may not have the time to determine whether a particular redemption would have an adverse effect on the Fund before the redemption request is paid.
- At any time, the Fund may establish or change investment minimums.
- The Fund may make material changes to or discontinue the exchange privilege on 60 days' notice to insurance company or Fund of Fund shareholders, or as otherwise provided by law.
- Purchases of shares of the Fund (including the purchase side of an exchange) may be made only when such shares are eligible for sale in the appropriate state or jurisdiction.
- In unusual circumstances, we may temporarily suspend redemptions or postpone the payment of proceeds, as allowed by federal securities laws.
- For redemptions over a certain amount, the Fund may, but is not required to, pay redemption proceeds in securities or other assets rather than cash (also known as a redemption in-kind) if the investment manager determines it is in the best interest of the Fund, consistent with applicable law. The investment manager will, in its sole discretion, determine whether a redemption in-kind will be considered for a particular redemption request or type of redemption request. In certain circumstances, however, the investment manager may not have the ability to determine whether a particular redemption could be paid in-kind before the redemption request is paid. If a redemption request is redeemed in-kind, investors should expect to incur transaction costs upon the disposition of the securities received in the distribution.
- To permit their investors to obtain the current price, participating insurance companies and funds of funds are responsible for transmitting all orders to the Fund promptly.

Questions

More detailed information about the Trust and the Fund's account policies can be found in the Fund's SAI. If you have any questions about the Fund, you can write to us at One Franklin Parkway, P.O. Box 7777, San Mateo, CA 94403-7777. You can also call us at 1-800/362-6243 (a toll-free number). For your protection and to help ensure we provide you with quality service, all calls may be monitored or recorded.
