FRANKLIN MUTUAL SHARES VIP FUND

Investment Goal

Capital appreciation. Its secondary goal is income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **The table and the example do not include any fees or sales charges imposed by variable insurance contracts, qualified retirement plans or funds of funds.** If they were included, your costs would be higher.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class 1	Class 2	Class 4
Management fees	0.68%	0.68%	0.68%
Distribution and service (12b-1) fees	None	0.25%	0.35%
Other expenses	0.01%	0.01%	0.01%
Total annual Fund operating expenses	0.69%	0.94%	1.04%

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of the period. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class 1	\$70	\$221	\$384	\$859
Class 2	\$96	\$300	\$520	\$1,155
Class 4	\$106	\$331	\$574	\$1,271

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 32.95% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests primarily in equity securities (including securities convertible into, or that the investment manager expects to be exchanged for, common or preferred stock) of U.S. and foreign companies that the investment manager believes are available at market prices less than their value based on certain recognized or objective criteria (fundamental value). Following this value-oriented strategy, the Fund invests primarily in undervalued securities (securities trading at a discount to fundamental value). The equity securities in which the Fund invests are primarily common stock. To a lesser extent, the Fund also invests in merger arbitrage securities and the debt and equity of distressed companies.

The Fund may invest a significant portion of its assets (up to 35%) in foreign securities, which may include sovereign debt and participations in foreign government debt. The Fund presently does not intend to invest more than 15% of its assets in foreign securities. Although the investment manager will search for investments across a large number of countries and regions, from time to time, based on economic conditions, the Fund may have significant positions in particular countries or regions.

The Fund is not limited to pre-set maximums or minimums governing the size of the companies in which it may invest. However, the Fund currently invests the equity portion of its portfolio predominantly in large- and mid-cap companies, with the remaining portion of its equity portfolio in smaller companies.

Although the investment manager searches for investments across a large number of sectors, from time to time, based on economic conditions, the Fund may have significant positions in particular sectors.

The Fund regularly attempts to hedge (protect) against currency risks, largely using currency-related derivatives, such as forward contracts and currency futures contracts (including currency index futures contracts) when, in the investment manager's opinion, it would be advantageous to the Fund to do so. The Fund may also, from time to time, attempt to hedge against market risk using a variety of other equity- and credit-related derivatives.

Portfolio Selection

The investment manager employs a research driven, fundamental value strategy for the Fund. Investments are generally selected based on the investment manager's own analysis of the security's fundamental value, including for equity securities, an analysis of cash flow potential, long-term earnings, multiples of earnings, book value, and

FUND SUMMARY

fundamental analysis, including environmental, social and governance (ESG) considerations. The investment manager examines each investment separately and there are no set criteria as to specific value parameters, asset size, earnings or industry type. The investment manager does not assess every investment for ESG factors and, when it does, not every ESG factor may be identified or evaluated. For example, the investment manager's assessment of investments in special situations investments, notably merger arbitrage and distressed debt, generally does not include analysis of ESG factors.

Principal Risks

You could lose money by investing in the Fund. Mutual fund shares are not deposits or obligations of, or guaranteed or endorsed by, any bank, and are not insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other agency of the U.S. government.

Market: The market values of securities or other investments owned by the Fund will go up or down, sometimes rapidly or unpredictably. The market value of a security or other investment may be reduced by market activity or other results of supply and demand unrelated to the issuer. This is a basic risk associated with all investments. When there are more sellers than buyers, prices tend to fall. Likewise, when there are more buyers than sellers, prices tend to rise. In addition, the value of the Fund's investments may go up or down due to general market or other conditions that are not specifically related to a particular issuer, such as: real or perceived adverse economic changes, including widespread liquidity issues and defaults in one or more industries; changes in interest or exchange rates; unexpected natural and man-made world events, such as diseases or disasters; financial, political or social disruptions, including terrorism and war; and U.S. trade disputes or other disputes with specific countries that could result in tariffs, trade barriers and investment restrictions in certain securities in those countries. Any of these conditions can adversely affect the economies of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen.

Stock prices tend to go up and down more dramatically than those of debt securities. A slower-growth or recessionary economic environment could have an adverse effect on the prices of the various stocks held by the Fund.

Value Style Investing: A value stock may not increase in price as anticipated by the investment manager if other investors fail to recognize the company's value and bid up the price, the markets favor faster-growing companies, or the factors that the investment manager believes will increase the price of the security do not occur or do not have the anticipated effect.

Foreign Securities (non-U.S.): Investing in foreign securities, including sovereign debt securities, typically involves more risks than investing in U.S. securities,

including risks related to currency exchange rates and policies, country or government specific issues, less favorable trading practices or regulation and greater price volatility. Certain of these risks also may apply to securities of U.S. companies with significant foreign operations.

Regional: To the extent that the Fund invests a significant portion of its assets in a specific geographic region or a particular country, including Europe, the Fund will generally have more exposure to the specific regional or country risks. In the event of economic or political turmoil or a deterioration of diplomatic relations in a region or country where a substantial portion of the Fund's assets are invested, the Fund may experience substantial illiquidity or reduction in the value of the Fund's investments. Adverse conditions in a certain region or country can adversely affect securities of issuers in other countries whose economies appear to be unrelated. Current uncertainty concerning the economic consequences of Russia's military invasion of Ukraine in February 2022 has increased market volatility.

Focus: To the extent that the Fund focuses on particular countries, regions, industries, sectors or types of investments from time to time, the Fund may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments.

Small and Mid Capitalization Companies: Securities issued by small and mid capitalization companies may be more volatile in price than those of larger companies and may involve substantial risks. Such risks may include greater sensitivity to economic conditions, less certain growth prospects, lack of depth of management and funds for growth and development, and limited or less developed product lines and markets. In addition, small and mid capitalization companies may be particularly affected by interest rate increases, as they may find it more difficult to borrow money to continue or expand operations, or may have difficulty in repaying any loans. The markets for securities issued by small and mid capitalization companies also tend to be less liquid than the markets for securities issued by larger companies.

Derivative Instruments: The performance of derivative instruments depends largely on the performance of an underlying instrument, such as a currency, security, interest rate or index, and such instruments often have risks similar to their underlying instrument, in addition to other risks. Derivative instruments involve costs and can create economic leverage in the Fund's portfolio which may result in significant volatility and cause the Fund to participate in losses (as well as gains) in an amount that exceeds the Fund's initial investment. Other risks include illiquidity, mispricing or improper valuation of the derivative instrument, and imperfect correlation between the value of the derivative and the underlying instrument so that the Fund may not realize the intended benefits. When a derivative is used for hedging, the change in value of the derivative may also not correlate specifically with the currency, security, interest rate, index or other risk being hedged. With over-the-counter

derivatives, there is the risk that the other party to the transaction will fail to perform.

Merger Arbitrage Securities and Distressed Companies:

A merger or other restructuring, or a tender or exchange offer, proposed or pending at the time the Fund invests in merger arbitrage securities may not be completed on the terms or within the time frame contemplated, which may result in losses to the Fund. Debt obligations of distressed companies typically are unrated, lower-rated, in default or close to default and are generally more likely to become worthless than the securities of more financially stable companies.

Liquidity: The trading market for a particular security or type of security or other investments in which the Fund invests may become less liquid or even illiquid. Reduced liquidity will have an adverse impact on the Fund's ability to sell such securities or other investments when necessary to meet the Fund's liquidity needs, which may arise or increase in response to a specific economic event or because the investment manager wishes to purchase particular investments or believes that a higher level of liquidity would be advantageous. Reduced liquidity will also generally lower the value of such securities or other investments. Market prices for such securities or other investments may be relatively volatile.

Management: The Fund is subject to management risk because it is an actively managed investment portfolio. The Fund's investment manager applies investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired results.

ESG Considerations: ESG considerations are one of a number of factors that the investment manager examines when considering investments for the Fund's portfolio. In light of this, the issuers in which the Fund invests may not be considered ESG-focused companies. In addition, ESG considerations assessed as part of the Fund's investment process may vary across types of eligible investments and issuers. The investment manager does not assess every investment for ESG factors and, when it does, not every ESG factor may be identified or evaluated. The investment manager's assessment of an issuer may differ from that of investors, third-party service providers, such as ratings providers, and other funds. As a result, securities selected by the investment manager may not reflect the beliefs and values of any particular investor. The investment manager also may be dependent on the availability of timely, complete and accurate ESG data being reported by issuers and/or third-party research providers to evaluate ESG factors. ESG factors are often not uniformly measured or defined, which could impact the investment manager's ability to assess an issuer. While the investment manager views ESG considerations as having the potential to contribute to the Fund's long-term performance, there is no guarantee that such results will be achieved.

Cybersecurity: Cybersecurity incidents, both intentional and unintentional, may allow an unauthorized party to gain

access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, cause the Fund, the investment manager, and/or their service providers (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The investment manager has limited ability to prevent or mitigate cybersecurity incidents affecting third party service providers, and such third party service providers may have limited indemnification obligations to the Fund or the investment manager. Cybersecurity incidents may result in financial losses to the Fund and its shareholders, and substantial costs may be incurred in an effort to prevent or mitigate future cybersecurity incidents. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cybersecurity incidents.

Because technology is frequently changing, new ways to carry out cyber attacks are always developing. Therefore, there is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on the Fund's ability to plan for or respond to a cyber attack. Like other funds and business enterprises, the Fund, the investment manager, and their service providers are subject to the risk of cyber incidents occurring from time to time.

Performance

The following bar chart and table provide some indication of the risks of investing in the Fund. The bar chart shows changes in the Fund's performance from year to year for Class 2 shares. The table shows how the Fund's average annual returns for 1 year, 5 years, 10 years or since inception, as applicable, compared with those of a broad measure of market performance and an additional index with

characteristics relevant to the Fund. The Fund's past performance is not necessarily an indication of how the Fund will perform in the future.

Performance reflects all Fund expenses but does not include any fees or sales charges imposed by variable insurance contracts, qualified plans or funds of funds. If they had been included, the returns shown below would be lower. Investors should consult the variable insurance contract prospectus, or the disclosure documents for qualified plans or funds of funds for more information.

Class 2 Annual Total Returns

Best Quarter:	2020, Q4	17.35%
Worst Quarter:	2020, Q1	-29.35%

Average Annual Total Returns

For periods ended December 31, 2024

	1 Year	5 Years	10 Years

Portfolio Managers

Christian Correa, CFA

Portfolio Manager of Franklin Mutual and portfolio manager of the Fund since 2020.

Grace Hoefig

Portfolio Manager of Franklin Mutual and portfolio manager of the Fund since 2020.

Aman Gupta, CFA

Portfolio Manager of Franklin Mutual and portfolio manager of the Fund since March 2025.

Purchase and Sale of Fund Shares

Shares of the Fund are sold to insurance companies' separate accounts (Insurers) to fund variable annuity or variable life insurance contracts and to qualified plans. Insurance companies offer variable annuity and variable life insurance products through separate accounts. Shares of the Fund may also be sold to other mutual funds, either as underlying funds in a fund of funds or in other structures. In addition, Fund shares are held by a limited number of Insurers, qualified retirement plans and, when applicable, funds of funds. Substantial withdrawals by one or more Insurers, qualified retirement plans or funds of funds could reduce Fund assets, causing total Fund expenses to become higher than the numbers shown in the fees and expenses table above.

The terms of the offering of interests in separate accounts are included in the variable annuity or variable life insurance product prospectus. The terms of offerings of funds of funds are included in those funds' prospectuses. The terms of offering of qualified retirement plans are described in their disclosure documents. Investors should consult the variable contract prospectus, fund of fund prospectus, or plan disclosure documents for more information on fees and expenses imposed by variable insurance contracts, funds of funds or qualified retirement plans, respectively.

Taxes

Because shares of the Fund are generally purchased through variable annuity contracts or variable life insurance contracts, the Fund's distributions (which the Fund expects, based on its investment goals and strategies to consist of ordinary income, capital gains or some combination of both) will be exempt from current taxation if left to accumulate

within the variable contract. You should refer to your contract prospectus for more information on these tax consequences.

Payments to Sponsoring Insurance Companies and Other Financial Intermediaries

The Fund or its distributor (and related companies) may pay broker/dealers or other financial intermediaries (such as banks and insurance companies, or their related companies) for the sale and retention of variable contracts which offer Fund shares and/or for other services. These payments may create a conflict of interest for an intermediary or be a factor in the insurance company's decision to include the Fund as an investment option in its variable contract. For more information, ask your insurance company or financial advisor, visit your insurance company's or intermediary's website, or consult the Contract prospectus or this Fund prospectus.

FRANKLIN TEMPLETON VARIABLE INSURANCE PRODUCTS TRUST

Overview

Franklin Templeton Variable Insurance Products Trust (the Trust) currently consists of multiple series (Funds), offering a wide variety of investment choices. Funds may be available in multiple classes: Class 1, Class 2, Class 4 and Class 5. The classes are identical except that Class 2, Class 4 and Class 5 each has a distribution plan (see "Share Classes" under Fund Account Information). The Funds are not offered to the public; they are offered and sold only to: (1) insurance company separate accounts to serve as the underlying investment vehicle for variable contracts; (2) certain qualified plans; and (3) other funds of funds.

Investment Considerations

- The following give a general sense of the level of fund assets associated with a particular investment or strategy: "small portion" (less than 10%); "portion" (10% to 25%); "significant" (25% to 50%); "substantial" (50% to 66%); "primary" (66% to 80%); and "predominant" (80% or more). The percentages are not limitations unless specifically stated as such in this prospectus or in the Trust's Statement of Additional Information (SAI).

Risks

- Fund shares are not deposits or obligations of, or guaranteed or endorsed by, any bank, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other agency of the U.S. government. Fund shares involve investment risks, including the possible loss of principal.
- Because you could lose money by investing in a Fund, take the time to read each Fund description and consider all risks before investing.

Additional Information

More detailed information about each Fund, its investment policies, and its particular risks can be found in the SAI.

Investment Management

The Funds' investment managers and their affiliates manage as of February 28, 2025, approximately \$1.58 trillion in assets, and have been in the investment management business since 1947.

(THIS PAGE INTENTIONALLY LEFT BLANK)

FRANKLIN MUTUAL SHARES VIP FUND

Investment Goal

The Fund's principal investment goal is capital appreciation. Its secondary goal is income.

Principal Investment Policies and Practices

Under normal market conditions, the Fund invests primarily in equity securities (including securities convertible into, or that the investment manager expects to be exchanged for, common or preferred stock) of U.S. and foreign companies that the investment manager believes are available at market prices less than their value based on certain recognized or objective criteria (fundamental value). The equity securities in which the Fund invests are primarily common stock. Following this value-oriented strategy, the Fund invests primarily in:

- **Undervalued Securities** - Securities trading at a discount to fundamental value.

And, to a lesser extent, the Fund also invests in:

- **Merger Arbitrage Securities** - Securities of companies involved in restructurings (such as mergers, acquisitions, consolidations, liquidations, spin-offs, or tender or exchange offers) or that the investment manager believes are cheap relative to an economically equivalent security of another or the same company.
- **Distressed Companies** - Securities of companies that are, or are about to be, involved in reorganizations, financial restructurings, or bankruptcy.

An equity security represents a proportionate share of the ownership of a company; its value is based on the success or failure of the company's business, any income paid to stockholders, the value of its assets and general market conditions. Common stocks and preferred stocks, and securities convertible into common stocks are examples of equity securities. The Fund may invest in convertible securities without regard to the ratings assigned by the rating services.

In pursuit of its value-oriented strategy, the Fund is not limited to pre-set maximums or minimums governing the size of the companies in which it may invest. However, as a general rule, the Fund invests the equity portion of its portfolio predominantly in large- and mid-cap companies, with the remaining portion of its equity portfolio in smaller companies.

While the Fund does not concentrate in any one industry, from time to time, based on economic conditions, it may make significant investments in certain sectors, such as the financial services and healthcare sectors.

While the Fund generally purchases securities for investment purposes, the investment manager may seek to influence or control management, or invest in other companies that do so, when the investment manager believes the Fund may benefit.

The Fund may invest a significant portion (up to 35%) of its assets in foreign securities, which may include sovereign debt and participations in foreign government debt. The Fund presently does not intend to invest more than 15% of its assets in foreign securities. Although the investment manager will search for investments across a large number of countries and regions, from time to time, based on economic conditions, the Fund may have significant positions in particular countries or regions.

The Fund's investments in Distressed Companies typically involve the purchase of bank debt, lower-rated or defaulted debt securities, comparable unrated debt securities, trade claims or other indebtedness (or participations in the indebtedness) of such companies. Such other indebtedness generally represents a specific commercial loan or portion of a loan made to a company by a financial institution such as a bank. Loan participations represent fractional interests in a company's indebtedness and are generally made available by banks or other institutional investors. By purchasing all or a part of a company's direct indebtedness, the Fund, in effect, steps into the shoes of the lender. If the loan is secured, the Fund will have a priority claim to the assets of the company ahead of unsecured creditors and stockholders. The Fund generally makes such investments to achieve capital appreciation, rather than to seek income.

For purposes of pursuing its investment goal, the Fund regularly enters into currency-related transactions involving certain currency-related derivative instruments, including currency forwards and currency futures contracts (including currency index futures contracts). The use of derivative currency transactions may allow the Fund to obtain net long or net negative (short) exposure to selected currencies. The Fund may also enter into various other transactions involving equity-related derivatives, including put and call options on equity securities and equity total return swap agreements; and credit-related derivatives, including credit default swaps. The use of these derivative transactions may allow the Fund to obtain net long or net negative (short) exposures to selected countries, currencies or issuers.

The Fund may use any of the above currency techniques or other derivative transactions for the purposes of enhancing Fund returns, increasing liquidity, gaining exposure to particular instruments in more efficient or less expensive ways and/or hedging risks relating to changes in currency exchange rates, market prices and other market factors. By way of example, when the investment manager believes that the value of a particular foreign currency is expected to increase compared to the U.S. dollar, the Fund could enter into a forward contract to purchase that foreign currency at a

FUND DETAILS

future date. If at such future date the value of the foreign currency exceeds the then current amount of U.S. dollars to be paid by the Fund under the contract, the Fund will recognize a gain. When used for hedging purposes, a forward contract or other derivative instrument could be used to protect against possible declines in a currency's value where a security held or to be purchased by the Fund is denominated in that currency.

A currency forward contract is an obligation to purchase or sell a specific foreign currency in exchange for another currency, which may be U.S. dollars, at an agreed exchange rate (price) at a future date. Currency forwards are typically individually negotiated and privately traded by currency traders and their customers in the interbank market.

A futures contract is a standard binding agreement that trades on an exchange to buy or sell a specified quantity of an underlying instrument or asset at a specified price at a specified later date. A "sale" of a futures contract means the acquisition of a contractual obligation to deliver the underlying instrument called for by the contract at a specified price on a specified date. A "purchase" of a futures contract means the acquisition of a contractual obligation to acquire a specified quantity of the underlying instrument called for by the contract at a specified price on a specified date. The purchase or sale of a futures contract will allow the Fund to increase or decrease its exposure to the underlying instrument or asset. Although most futures contracts used by the Fund allow for a cash payment of the net gain or loss on the contract at maturity in lieu of delivery of the underlying instruments, some require the actual delivery or acquisition of the underlying instrument or asset. The Fund may buy and sell futures contracts that trade on U.S. and foreign exchanges.

Swap agreements, such as credit default swaps and total return swaps, are contracts between the Fund and another party (the swap counterparty) involving the exchange of payments on specified terms over periods ranging from a few days to multiple years. A swap agreement may be negotiated bilaterally and traded over-the-counter (OTC) between the two parties (for an uncleared swap) or, in some instances, must be transacted through a futures commission merchant (FCM) and cleared through a clearinghouse that serves as a central counterparty (for a cleared swap). In a basic swap transaction, the Fund agrees with the swap counterparty to exchange the returns (or differentials in rates of return) and/or cash flows earned or realized on a particular "notional amount" of underlying instruments. The notional amount is the set amount selected by the parties as the basis on which to calculate the obligations that they have agreed to exchange. The parties typically do not actually exchange the notional amount. Instead, they agree to exchange the returns that would be earned or realized if the notional amount were invested in given instruments or at given interest rates.

For credit default swaps, the "buyer" of the credit default swap agreement is obligated to pay the "seller" a periodic stream of payments over the term of the agreement in return

for a payment by the seller that is contingent upon the occurrence of a credit event with respect to an underlying reference debt obligation. A buyer of the credit default swap is purchasing the obligation of its counterparty to offset losses the buyer could experience if there was such a credit event. Generally, a credit event means bankruptcy, failure to timely pay interest or principal, obligation acceleration or default, or repudiation or restructuring of the reference debt obligation. The contingent payment by the seller generally is either the face amount of the reference debt obligation in exchange for the physical delivery of the reference debt obligation or a cash payment equal to the decrease in market value of the reference debt obligation following the occurrence of the credit event.

A total return swap is an agreement between two parties, pursuant to which one pays (and the other receives) an amount equal to the total return (including, typically, income and capital gains distributions, principal prepayment or credit) of an underlying reference asset (e.g., a note, bond or other security, group of securities or securities index) in exchange for a regular payment, at a floating rate based on SOFR, or alternatively at a fixed rate or the total rate of return on another financial instrument. The Fund may take either position in a total return swap (i.e., the Fund may receive or pay the total return on the underlying reference asset).

A call option gives the purchaser of the option, upon payment of a premium, the right to buy, and the seller the obligation to sell, the underlying instrument at the exercise price. Conversely, a put option gives the purchaser of the option, upon payment of a premium, the right to sell, and the seller of the option the obligation to buy, the underlying instrument at the exercise price.

The investment manager considers various factors, such as availability and cost, in deciding whether to use a particular derivative instrument or strategy. Moreover, investors should bear in mind that the Fund is not obligated to actively engage in any derivative transactions.

The Fund may also engage from time to time in an "arbitrage" strategy. When engaging in an arbitrage strategy, the Fund typically buys one security while at the same time selling short another security. The Fund generally buys the security that the investment manager believes is either cheap relative to the price of the other security or otherwise undervalued, and sells short the security that the investment manager believes is either expensive relative to the price of the other security or otherwise overvalued. In doing so, the Fund attempts to profit from a perceived relationship between the values of the two securities. The Fund generally engages in an arbitrage strategy in connection with an announced corporate restructuring, such as a merger, acquisition or tender offer, or other corporate action or event.

Portfolio Selection

The investment manager employs a research driven, fundamental value strategy for the Fund. In choosing equity investments, the investment manager focuses on the market

price of a company's securities relative to the investment manager's own evaluation of the company's fundamental value, including an analysis of cash flow potential, long-term earnings, multiples of earnings, cash flow, and book value. Similarly, debt securities and other indebtedness, including loan participations, are generally selected based on the investment manager's own analysis of the security's fundamental value rather than the coupon rate or rating of the security. The investment manager examines each investment separately and there are no set criteria as to specific value parameters, asset size, earnings or industry type. The investment manager may consider sustainability issues, including environmental, social, governance (ESG) factors alongside traditional financial measures to provide a more comprehensive view of the value, risk and return potential of an investment. ESG factors may include, but are not limited to, emissions, energy and waste management, labor practices and relations, exposure to potential regulatory changes, and corporate governance. The investment manager's fundamental research analysts, using their industry expertise, evaluate which factors the investment manager believes to be material to the investment and incorporate both the risks and opportunities of these factors into their fundamental valuation. The weight given to consideration of any factor will vary depending on the analyst's assessment of both the potential materiality and probability of that factor, and will only be one component of any investment decision. In addition, ESG factors considered may change over time. The investment manager does not assess every investment for ESG factors and, when it does, not every ESG factor may be identified or evaluated. For example, the investment manager's assessment of investments in special situations investments, notably merger arbitrage and distressed debt, generally does not include analysis of ESG factors.

Exclusion of Investment Manager from Commodity Pool Operator Definition

With respect to the Fund, the investment manager has claimed an exclusion from the definition of "commodity pool operator" (CPO) under the Commodity Exchange Act (CEA) and the rules of the Commodity Futures Trading Commission (CFTC) and, therefore, is not subject to CFTC registration or regulation as a CPO. In addition, with respect to the Fund, the investment manager is relying upon a related exclusion from the definition of "commodity trading advisor" (CTA) under the CEA and the rules of the CFTC.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in commodity futures, commodity options and swaps, which in turn include non-deliverable currency forward contracts, as further described in the Fund's Statement of Additional Information (SAI). Because the investment manager and the Fund intend to comply with the terms of the CPO exclusion, the Fund may, in the future, need to adjust its investment strategies, consistent with its investment goal, to limit its investments in these types of instruments. The Fund is not intended as a vehicle for trading in the commodity futures,

commodity options, or swaps markets. The CFTC has neither reviewed nor approved the investment manager's reliance on these exclusions, or the Fund, its investment strategies or this prospectus.

Temporary Investments

The investment manager may keep a portion, which may be significant at times, of the Fund's assets in cash or invested in high-quality short-term, money market instruments, corporate debt, or direct or indirect U.S. and non-U.S. government and agency obligations, when it believes that insufficient investment opportunities meeting the Fund's investment criteria exist or that it may otherwise be necessary to maintain liquidity. For example, when prevailing market valuations for securities are high, there may be fewer securities available at prices below their fundamental value. In addition, when the investment manager believes market or economic conditions are unfavorable for investors or seeks to maintain liquidity, the investment manager may invest up to 100% of the Fund's assets in U.S. or non-U.S. dollar denominated short-term investments, including cash or cash equivalents. In these circumstances, the Fund may be unable to pursue its investment goals.

Principal Risks

Market: The market values of securities or other investments owned by the Fund will go up or down, sometimes rapidly or unpredictably. The Fund's investments may decline in value due to factors affecting individual issuers (such as the results of supply and demand), or sectors within the securities markets. The value of a security or other investment also may go up or down due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in interest rates or exchange rates, or adverse investor sentiment generally. Furthermore, events involving limited liquidity, defaults, non-performance or other adverse developments that affect one industry, such as the financial services industry, or concerns or rumors about any events of these kinds, have in the past and may in the future lead to market-wide liquidity problems, may spread to other industries, and could negatively affect the value and liquidity of the Fund's investments. In addition, unexpected events and their aftermaths, such as the spread of diseases; natural, environmental or man-made disasters; financial, political or social disruptions; terrorism and war; and other tragedies or catastrophes, can cause investor fear and panic, which can adversely affect the economies of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen. During a general downturn in the securities markets, multiple asset classes may decline in value. When markets perform well, there can be no assurance that securities or other investments held by the Fund will participate in or otherwise benefit from the advance.

The long-term impact of the COVID-19 pandemic and its subsequent variants on economies, markets, industries and individual issuers is not known. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, took extraordinary actions to support local and global economies and the financial markets in response to the COVID-19 pandemic. This and other government intervention into the economy and financial markets have resulted in a large expansion of government deficits and debt, the long-term consequences of which are not known.

The United States and various countries are currently involved in disputes over trade and other matters, which may result in tariffs, investment restrictions and other adverse impacts on affected companies and securities. Trade disputes may adversely affect the economies of the United States and its trading partners, as well as companies directly or indirectly affected and financial markets generally. For example, the United States has imposed tariffs and other trade barriers on Chinese exports, has restricted sales of certain categories of goods to China, and has established barriers to investments in China. The United States government has prohibited U.S. persons from investing in Chinese companies designated as related to the Chinese military. These and possible future restrictions could limit the Fund's opportunities for investment and require the sale of securities at a loss or make them illiquid. Moreover, the Chinese government is involved in a longstanding dispute with Taiwan that has included threats of invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt unification of Taiwan by force, or if other geopolitical conflicts develop or get worse, economies, markets and individual securities may be severely affected both regionally and globally, and the value of the Fund's assets may go down.

Stock prices tend to go up and down more dramatically than those of debt securities. A slower-growth or recessionary economic environment could have an adverse effect on the prices of the various stocks held by the Fund.

Value Style Investing

Value securities may not increase in price as anticipated by the investment manager, and may even decline further in value, if other investors fail to recognize the company's value, or favor investing in faster-growing companies, or if the events or factors that the investment manager believes will increase a security's market value do not occur.

The Fund's bargain-driven focus may result in the Fund choosing securities that are not widely followed by other investors. Securities that are considered "cheaply" priced also may include those of companies reporting poor earnings, companies whose share prices have declined sharply (such as growth companies that have recently stumbled to levels considered "cheap" in the investment manager's opinion), turnarounds, cyclical companies, or companies emerging from bankruptcy. All of these securities may have a higher risk of being ignored or rejected, and

therefore undervalued, by the market, or decreasing further in value.

Foreign Securities (non-U.S.): Investing in foreign securities typically involves more risks than investing in U.S. securities. Certain of these risks also may apply to securities of U.S. companies with significant foreign operations. These risks can increase the potential for investment loss in the Fund and may include, among others, currency risks (such as fluctuations in currency exchange rates and currency devaluations); country risks (such as political, diplomatic, or regional conflicts, terrorism or war, social and economic instability, and internal or external policies or economic sanctions limiting or restricting foreign investment, the movement of assets or other economic activity); and risks associated with the state of a country's financial markets and legal institutions. Other foreign securities risks may include unfavorable trading, settlement or custodial practices, unfavorable tax policies, less government supervision, less publicly available information, less stringent investor protection standards, limited legal redress for violations of law, limited trading markets and greater illiquidity and greater price volatility.

Regional: Adverse conditions in a certain region or country can adversely affect securities of issuers in other countries whose economies appear to be unrelated. To the extent that the Fund invests a significant portion of its assets in a specific geographic region or a particular country, the Fund will generally have more exposure to the risks affecting that specific geographic region or country. In the event of economic or political turmoil or a deterioration of diplomatic relations in a region or country where a substantial portion of the Fund's assets are invested, the Fund may experience substantial illiquidity or reduction in the value of the Fund's investments.

The risk of investments in Europe may be heightened due to the current uncertainty concerning the economic consequences of Russia's military invasion of Ukraine in February 2022, which has increased market volatility.

Focus: To the extent that the Fund focuses on particular countries, regions, industries, sectors or types of investments from time to time, the Fund may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments.

Financial services companies: Financial services companies are subject to extensive government regulation that may affect their profitability in many ways, including by limiting the amount and types of loans and other commitments they can make, and the interest rates and fees they can charge. A financial services company's profitability, and therefore its stock prices, is especially sensitive to interest rate changes as well as the ability of borrowers to repay their loans. Changing regulations, continuing consolidations, and development of new products and structures all are likely to have a significant impact on financial services companies.

Healthcare companies: The activities of healthcare companies may be funded or subsidized by federal and state governments. If government funding and subsidies are reduced or discontinued, the profitability of these companies could be adversely affected. Healthcare companies may also be affected by government policies on healthcare reimbursements, regulatory approval for new drugs and medical products, and similar matters. They are also subject to legislative risk, i.e., the risks associated with the reform of the healthcare system through legislation.

Small and Mid Capitalization Companies: While small and mid capitalization companies may offer substantial opportunities for capital growth, they also may involve more risks than larger companies. Historically, securities issued by small and mid capitalization companies have been more volatile in price than securities that are issued by larger companies, especially over the short term. Among the reasons for the greater price volatility are the less certain growth prospects of small and mid capitalization companies, the lower degree of liquidity in the markets for such securities, and the greater sensitivity of small and mid capitalization companies to changing economic conditions.

In addition, small and mid capitalization companies may lack depth of management, be unable to generate funds necessary for growth or development, have limited product lines or be developing or marketing new products or services for which markets are not yet established and may never become established. Small and mid capitalization companies may be particularly affected by interest rate increases, as they may find it more difficult to borrow money to continue or expand operations, or may have difficulty in repaying loans, particularly those with floating interest rates.

Derivative Instruments: The performance of derivative instruments depends largely on the performance of an underlying instrument, such as a currency, security, interest rate or index, and such instruments often have risks similar to the underlying instrument, in addition to other risks. Derivative instruments involve costs and can create economic leverage in the Fund's portfolio, which may result in significant volatility and cause the Fund to participate in losses (as well as gains) in an amount that significantly exceeds the Fund's initial investment. Other risks include illiquidity, mispricing or improper valuation of the derivative instrument, and imperfect correlation between the value of the derivative and the underlying instrument so that the Fund may not realize the intended benefits. Their successful use will usually depend on the investment manager's ability to accurately forecast movements in the market relating to the underlying instrument. Should a market or markets, or prices of particular classes of investments, move in an unexpected manner, especially in unusual or extreme market conditions, the Fund may not realize the anticipated benefits of the transaction, and it may realize losses, which could be significant. If the investment manager is not successful in using such derivative instruments, the Fund's performance may be worse than if the investment manager did not use such derivative instruments at all. When a derivative is used for hedging, the change in value of the derivative instrument

also may not correlate specifically with the currency, security, interest rate index or other risk being hedged. There is also the risk, especially under extreme market conditions, that an instrument, which usually would operate as a hedge, provides no hedging benefits at all.

Use of these instruments could also result in a loss if the counterparty to the transaction does not perform as promised, including because of such counterparty's bankruptcy or insolvency. This risk is heightened with respect to over-the-counter (OTC) instruments, such as certain swap agreements and may be greater during volatile market conditions. Other risks include the inability to close out a position because the trading market becomes illiquid (particularly in the OTC markets) or the availability of counterparties becomes limited for a period of time. In addition, the presence of speculators in a particular market could lead to price distortions. To the extent that the Fund is unable to close out a position because of market illiquidity, the Fund may not be able to prevent further losses of value in its derivatives holdings and the Fund's liquidity may be impaired. Some derivatives can be particularly sensitive to changes in interest rates or other market prices. Investors should bear in mind that, while the Fund intends to use derivative strategies on a regular basis, it is not obligated to actively engage in these transactions, generally or in any particular kind of derivative, if the investment manager elects not to do so due to availability, cost or other factors.

Many swaps currently are, and others eventually are expected to be, required to be cleared through a central counterparty. Central clearing is designed to reduce counterparty credit risk and increase liquidity compared to OTC swaps, but it does not eliminate those risks completely. With cleared swaps, there is also a risk of loss by the Fund of its initial and variation margin deposits in the event of bankruptcy of the futures commission merchant (FCM) with which the Fund has an open position, or the central counterparty in a swap contract. With cleared swaps, the Fund may not be able to obtain as favorable terms as it would be able to negotiate for a bilateral, uncleared swap. In addition, an FCM may unilaterally amend the terms of its agreement with the Fund, which may include the imposition of position limits or additional margin requirements with respect to the Fund's investment in certain types of swaps. The regulation of cleared and uncleared swaps, as well as other derivatives, is a rapidly changing area of law and is subject to modification by government and judicial action. In addition, the SEC, Commodity Futures Trading Commission (CFTC) and the exchanges are authorized to take extraordinary actions in the event of a market emergency. It is not possible to predict fully the effects of current or future regulation.

The use of derivative strategies may also have a tax impact on the Fund. The timing and character of income, gains or losses from these strategies could impair the ability of the investment manager to use derivatives when it wishes to do so.

Merger Arbitrage Securities and Distressed Companies:

A merger or other restructuring, or a tender or exchange offer, proposed or pending at the time the Fund invests in merger arbitrage securities may not be completed on the terms or within the time frame contemplated, which may result in losses to the Fund. Debt obligations of distressed companies typically are unrated, lower-rated, in default or close to default and are generally more likely to become worthless than the securities of more financially stable companies.

Liquidity: Liquidity risk exists when the markets for particular securities or types of securities or other investments are or become relatively illiquid so that the Fund is unable, or it becomes more difficult for the Fund, to sell the security or other investment at the price at which the Fund has valued the security. Illiquidity may result from political, economic or issuer specific events; supply/demand imbalances; changes in a specific market's size or structure, including the number of participants; or overall market disruptions. Securities or other investments with reduced liquidity or that become illiquid may involve greater risk than securities with more liquid markets. Market prices or quotations for illiquid securities may be volatile, and there may be large spreads between bid and ask prices. Reduced liquidity may have an adverse impact on market price and the Fund's ability to sell particular securities when necessary to meet the Fund's liquidity needs, which may arise or increase in response to a specific economic event or because the investment manager wishes to purchase particular investments or believes that a higher level of liquidity would be advantageous. An investment may become illiquid if the Fund and its affiliates receive material non-public information about the issuer or the investment. To the extent that the Fund and its affiliates hold a significant portion of an issuer's outstanding securities, the Fund may be subject to greater liquidity risk than if the issuer's securities were more widely held.

Management: The Fund is actively managed and could experience losses (realized and unrealized) if the investment manager's judgment about markets, interest rates or the attractiveness, relative values, liquidity, or potential appreciation of particular investments made for the Fund's portfolio prove to be incorrect. The Fund could also experience losses if there are imperfections, errors or limitations in the models, tools, and data used by the investment manager or if the investment manager's techniques or investment decisions do not produce the desired results. Additionally, legislative, regulatory, or tax developments may affect the investment techniques available to the investment manager in connection with managing the Fund and may also adversely affect the ability of the Fund to achieve its investment goal.

ESG Considerations: ESG considerations are one of a number of factors that the investment manager examines when considering investments for the Fund's portfolio. In light of this, the issuers in which the Fund invests may not be considered ESG-focused companies. In addition, ESG considerations assessed as part of the Fund's investment

process may vary across types of eligible investments and issuers. The investment manager does not assess every investment for ESG factors and, when it does, not every ESG factor may be identified or evaluated. The investment manager's assessment of an issuer may differ from that of investors, third-party service providers, such as ratings providers, and other funds. As a result, securities selected by the investment manager may not reflect the beliefs and values of any particular investor. The investment manager also may be dependent on the availability of timely, complete and accurate ESG data being reported by issuers and/or third-party research providers to evaluate ESG factors. ESG factors are often not uniformly measured or defined, which could impact the investment manager's ability to assess an issuer. While the investment manager views ESG considerations as having the potential to contribute to the Fund's long-term performance, there is no guarantee that such results will be achieved.

Cybersecurity: Cybersecurity incidents, both intentional and unintentional, may allow an unauthorized party to gain access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, cause the Fund, the investment manager, and/or their service providers (including, but not limited to, Fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The investment manager has limited ability to prevent or mitigate cybersecurity incidents affecting third party service providers, and such third party service providers may have limited indemnification obligations to the Fund or the investment manager. Cybersecurity incidents may result in financial losses to the Fund and its shareholders, and substantial costs may be incurred in an effort to prevent or mitigate future cybersecurity incidents. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cybersecurity incidents.

Because technology is frequently changing, new ways to carry out cyber attacks are always developing. Therefore, there is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on the Fund's ability to plan for or respond to a cyber attack. Like other funds and business enterprises, the Fund, the investment manager, and their service providers are subject to the risk of cyber incidents occurring from time to time.

More detailed information about the Fund and its policies and risks can be found in the Fund's Statement of Additional Information (SAI).

A description of the Fund's policies and procedures regarding the release of portfolio holdings information is also available in the Fund's SAI. Portfolio holdings information can be viewed online at www.franklintempleton.com.

Management

Franklin Mutual Advisers, LLC (Franklin Mutual), 101 John F. Kennedy Parkway, Short Hills, NJ 07078, is the Fund's investment manager.

The Fund is managed by a team of dedicated professionals focused on investments in equity securities they consider to be undervalued. The portfolio managers of the Fund are as follows:

Christian Correa, CFA Portfolio Manager

Mr. Correa has been a co-lead portfolio manager of the Fund since 2020. He joined Franklin Templeton in 2003.

Grace Hoefig Portfolio Manager

Ms. Hoefig has been a co-lead portfolio manager of the Fund since 2020. She joined Franklin Templeton in 2008.

Aman Gupta, CFA Portfolio Manager

Mr. Gupta has been a co-lead portfolio manager of the Fund since March 2025. He joined Franklin Templeton in 2010.

As co-lead portfolio managers of the Fund, Messrs. Correa and Gupta and Ms. Hoefig are jointly and primarily responsible for the day-to-day management of the Fund's portfolio. They have equal authority over all aspects of the Fund's investment portfolio, including, but not limited to, purchases and sales of individual securities, portfolio risk assessment, and the management of daily cash balances in accordance with anticipated investment management requirements. The degree to which each portfolio manager may perform these functions, and the nature of these functions, may change from time to time.

CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

The Fund's SAI provides additional information about portfolio manager compensation, other accounts that they manage and their ownership of Fund shares.

The Fund pays Franklin Mutual a fee for managing the Fund's assets.

Franklin Mutual has agreed to reduce its fees to reflect reduced services resulting from the Fund's investments in Franklin Templeton affiliated funds.

For the fiscal year ended December 31, 2024, the Fund paid Franklin Mutual an effective management fee of 0.68% of the Fund's average net assets for investment management services.

A discussion regarding the basis for the board of trustees' approval of the Fund's investment management agreement is available in the Fund's report on Form N-CSR for the period ended June 30, 2024.

Manager of Managers Structure

The investment manager and the Trust have received an exemptive order from the SEC that allows the Fund to operate in a "manager of managers" structure whereby the investment manager can appoint and replace both wholly-

owned and unaffiliated sub-advisors, and enter into, amend and terminate sub-advisory agreements with such sub-advisors, each subject to board approval but without obtaining prior shareholder approval (Manager of Managers Structure). The Fund will, however, inform shareholders of the hiring of any new sub-advisor within 90 days after the hiring. The SEC exemptive order provides the Fund with greater flexibility and efficiency and alleviates the need for the Fund to incur the expense and delays associated with obtaining shareholder approval of such sub-advisory agreements.

The use of the Manager of Managers Structure with respect to the Fund is subject to certain conditions that are set forth in the SEC exemptive order. Under the Manager of Managers Structure, the investment manager has the ultimate responsibility, subject to oversight by the Fund's board of trustees, to oversee sub-advisors and recommend their hiring, termination and replacement. The investment manager will also, subject to the review and approval of the Fund's board of trustees: set the Fund's overall investment strategy; evaluate, select and recommend sub-advisors to manage all or a portion of the Fund's assets; and implement procedures reasonably designed to ensure that each sub-advisor complies with the Fund's investment goal, policies and restrictions. Subject to review by the Fund's board of trustees, the investment manager will allocate and, when appropriate, reallocate the Fund's assets among sub-advisors and monitor and evaluate the sub-advisors' performance.

Financial Highlights

This table presents the financial performance of Fund shares for the past five years or since inception. The table shows certain information on a single Fund share basis (per share performance). It also shows some key Fund statistics, such as total return (past performance) and expense ratios. Total return represents the annual change in value of a share assuming reinvestment of dividends and capital gains. This information has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, are available on the Fund's website and are included in the Form N-CSR filed with the SEC covering the period ended December 31, 2024, which is available upon request.

Franklin Mutual Shares VIP Fund - Class 1

	Year Ended December 31,				
	2024	2023	2022	2021	2020
Per share operating performance (for a share outstanding throughout the year)					
Net asset value, beginning of year	\$15.74	\$15.53	\$19.62	\$16.93	\$19.19
Income from investment operations ^a :					
Net investment income ^b	0.36	0.35	0.32	0.27	0.55 ^c

Additional Information, All Funds

Dealer Compensation

Franklin Distributors, LLC (Distributors) and/or its affiliates may provide financial support to insurance companies that use the Funds as underlying investment options for their variable contracts, securities dealers that sell shares of Franklin Templeton funds, or participate in the offering of variable insurance products that invest in the Trust (VIP Qualifying Dealers) or other financial intermediaries (together, the intermediaries). Such financial support may be made by payments from Distributors' and/or its affiliates' resources, including from Distributors' retention of underwriting concessions and, in the case of Rule 12b-1 share classes, from payments to Distributors under such plans.

Distributors makes these payments to intermediaries for the provision of services to contract holders, or for marketing support in connection with efforts to educate financial advisors or for the provision of other services which may facilitate, directly or indirectly, investment in the Funds. A number of factors will be considered in determining payments, including an intermediary's sales, assets and redemption rates, the nature and quality of any servicing provided to the Funds, and the quality of an intermediary's relationship with Distributors. Distributors will, on an annual basis, determine the advisability of continuing these payments. To the extent permitted by SEC and FINRA rules and other applicable laws and regulations, Distributors and/or its affiliates may pay or allow other promotional incentives or payments to dealers. Sale of shares of the Funds, as well as shares of other Franklin Templeton funds, is not considered a factor in the selection of securities dealers to execute the Funds' portfolio transactions. Accordingly, the allocation of portfolio transactions for execution by VIP Qualifying Dealers is not considered marketing support payments.

You can find further details in the SAI about the payments made by Distributors and/or its affiliates and the services provided by your insurance company, VIP Qualifying Dealer or other financial intermediary. While your insurance company's fees and charges are generally disclosed in the insurance contract prospectus, your VIP Qualifying Dealer may charge you additional fees or commissions other than those disclosed in this prospectus. You can ask your insurance company, VIP Qualifying Dealer or other financial intermediary for information about any payments they receive from Distributors and/or its affiliates and any services they provide, as well as about fees and/or commissions they charge. These payments and other fees and charges are not reflected in the fee table included in this prospectus. Additional disclosure may be included in the insurance contract prospectus.

Portfolio Holdings

A description of the Trust's policies and procedures regarding the release of portfolio holdings information for each Fund of the Trust (collectively, the "Fund") is also available in the Trust's SAI. Portfolio holdings information can be viewed online at franklintempleton.com.

Statements and Reports

Contract Owners should receive financial reports for the Fund related to their Contract from the sponsoring Insurer every six months.

Administrative Services

Franklin Templeton Services, LLC (FT Services) has an agreement with the investment managers to provide certain administrative services and facilities for each Fund.

FT Services or an affiliate, on behalf of itself and other affiliates of the managers, makes certain payments to insurance companies out of its own resources for certain services provided to the Funds by insurance companies relating to their investment in the Funds on behalf of variable contract owners. See "Dealer Compensation" or the SAI for more information.

Distributions and Taxes

Income and Capital Gains Distributions

As a regulated investment company, each Fund generally pays no federal income tax on the income and gains it distributes to its shareholders. Each Fund (sometimes referred to as "the Fund") intends to pay income dividends at least annually from its net investment income. Capital gains, if any, may be paid at least annually. The Fund may distribute income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will pay either income dividends or capital gain distributions.

Tax Considerations

The Trust consists of multiple Funds each of which for federal income tax purposes is treated separately from any other. Each Fund expects to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). Accordingly, the assets, income and distributions of the Fund are considered separately for purposes of determining whether the Fund qualifies as a regulated investment company. If the Fund so qualifies, it will not be subject to federal income tax on the portion of its income and gains that it distributes to shareholders. Additionally, each Fund

intends to comply with the diversification requirements imposed by Section 817(h) of the Code.

For federal income tax purposes, the insurance companies and their separate accounts are treated as the owners of the shares of the Fund selected as an investment option rather than the purchasers of a variable annuity contract or variable life insurance policy (variable contracts). In light of the tax-favored status of life insurance company separate accounts, there should be no adverse federal income tax consequences to them as a result of their buying, holding, exchanging or selling Fund shares or on their receipt of Fund distributions, subject to applicable limitations under the Code.

Insurance companies offer variable annuity and variable life insurance products to investors including pension plans (Contracts), through separate accounts (Insurers). When shares of the Fund are investment options of Contracts, separate accounts, and not the owners of the Contracts including group contract and pension plan certificate holders (Contract Owners), are generally the shareholders of the Fund. As a result, it is anticipated that any income dividends or capital gains distributions paid by the Fund will be exempt from current taxation to the purchaser of such variable contracts if left to accumulate within a variable contract. Withdrawals from such contracts may be subject to ordinary income tax and, if such withdrawals are made before age 59½, a 10% penalty tax. For more information on taxes, please refer to the accompanying prospectus of the annuity or life insurance program through which shares of the Fund are underlying investment options.

Other tax information. This discussion of "Distributions and Taxes" is for general information only and is not tax advice. You should consult your own tax advisor regarding your particular circumstances and about any federal, state or local tax consequences before making an investment in a variable contract or the Fund.

Fund Account Information

Buying Shares

Insurance companies offer variable annuity and variable life insurance products to investors including pension plans (Contracts), through separate accounts (Insurers). When shares of the Fund are investment options of Contracts, separate accounts, and not the owners of the Contracts including group contract and pension plan certificate holders (Contract Owners), are generally the shareholders of the Fund. Shares of the Fund may also be purchased by other mutual funds (funds of funds).

Shares of the Fund are sold at net asset value (NAV). When sold in connection with Contracts, the Fund corresponds with the investment options offered by the Insurer to Contract Owners. The board of trustees monitors the Fund for the existence of any material irreconcilable conflicts of interest between different types of their separate account

investors. If there were any such conflicts, the board of trustees will determine what action, if any, shall be taken in response. Please refer to the accompanying contract prospectus for information on how to select the Fund as an investment option.

Contract Owners' payments will be allocated by the insurance company separate account to sub-accounts that purchase shares of the Fund corresponding with the sub-account chosen by the Contract Owner, and are subject to any limits or conditions in the contract. Requests to buy shares are processed at the NAV next calculated after we or our designees receive the request in proper form. Please refer to your Contract prospectus or other disclosure document for further information. The Fund does not issue share certificates.

Selling Shares

An Insurer that holds shares of the Fund in connection with a Contract sells shares of the Fund to make benefit or surrender payments or to execute exchanges (transfers) between investment options under the terms of the Contract.

Exchanging Shares

Contract Owners may exchange interests in sub-accounts of an insurance company separate account that corresponds with shares of any one class or Fund, for interests in sub-accounts that correspond with shares of other classes or Funds, subject to the terms and any specific limitations on the exchange (or "transfer") privilege described in the Contract prospectus.

Frequent exchanges or excessive trading can harm performance and interfere with Fund portfolio management or operations and increase Fund costs. The Funds discourage short-term or excessive trading and may seek to restrict or reject such trading (please see "Fund Account Information - Frequent Trading Policy," below).

Frequent Trading Policy

The board of trustees has adopted the following policies and procedures with respect to frequent trading (Frequent Trading Policy):

Frequent trading generally. The Fund discourages and does not intend to accommodate short-term or frequent purchases and redemptions of fund shares, often referred to as "frequent trading," and asks its Fund of Fund investors and participating Insurers for their cooperation in trying to discourage such activity in their separate accounts by Contract Owners and their financial advisors. The Fund intends to seek to restrict or reject such trading or take other action, as described below, if in the judgment of the Fund manager or transfer agent such trading may interfere with the efficient management of the Fund's portfolio, may materially increase the Fund's transaction costs, administrative costs or taxes, or may otherwise be detrimental to the interests of the Fund and its shareholders.

Frequent trading consequences. If information regarding trading activity in the Fund or in any other Franklin

Templeton fund or non-Franklin Templeton fund is brought to the attention of the Fund's investment manager or transfer agent and based on that information the Fund or its investment manager or transfer agent in their sole discretion conclude that such trading may be detrimental to the Fund as described in this Frequent Trading Policy, the Fund may temporarily or permanently bar future purchases into the Fund or, alternatively, may limit the amount, number or frequency of any future purchases and/or the method by which an Insurer or a Fund of Funds may request future purchases and redemptions (including purchases and/or redemptions by an exchange or transfer between the Fund and any other mutual fund). In determining what actions should be taken, the Fund's transfer agent may consider a variety of factors, including the potential impact of such remedial actions on the Fund or its shareholders. If the Fund is a "fund of funds," the Fund's transfer agent may take into account the impact of the trading activity and of any proposed remedial action on both the Fund and the underlying funds in which the Fund invests.

In considering trading activity, the Fund may consider, among other factors, trading history both directly and, if known, through financial intermediaries, in the Fund, in other Franklin Templeton funds, in non-Franklin Templeton mutual funds, or in accounts under common control or ownership.

Frequent trading through Insurers. As a Contract Owner you are also subject to this policy. An Insurer's order for purchases and/or redemptions pursuant to a Contract Owner's instructions (including purchases and/or redemptions by an exchange or transfer between the Fund and any mutual fund) are submitted pursuant to aggregated orders (Aggregated Orders). A fund of fund's order for purchases and/or redemptions pursuant to its investors' instructions are also submitted pursuant to Aggregated Orders. While the Fund will encourage Insurers and funds of funds to apply the Fund's Frequent Trading Policy to their investors, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Frequent Trading Policy because Insurers and funds of funds have the relationships with, and are responsible for maintaining the account records of, the individual investors. For example, should it occur, the Fund may not be able to detect frequent trading that may be facilitated by financial intermediaries or made difficult to identify in the Aggregated Orders used by Insurers and Fund of Fund investors.

Therefore, the Fund or its agent selectively monitor the Aggregated Orders used by Insurers and Fund of Fund investors for purchases, exchanges and redemptions in respect of all their investors and seek the cooperation of Insurers and Fund of Fund investors to apply the Fund's Frequent Trading Policy. There may be legal and technological limitations on the ability of an Insurer or Fund of Fund to impose trading restrictions and to apply the Fund's Frequent Trading Policy to their investors through such methods as implementing short-term trading limitations or restrictions, assessing the Fund's redemption fee (if applicable) and monitoring trading activity for what might be frequent trading. As a result, the Fund may not be able to

determine whether trading by Insurers or funds of funds in respect of their investors is contrary to the Fund's Frequent Trading Policy.

Risks from frequent trading. Depending on various factors, including the size of the Fund, the amount of assets the portfolio manager typically maintains in cash or cash equivalents and the dollar amount and number and frequency of trades and the types of securities in which the Fund typically invests, short-term or frequent trading may interfere with the efficient management of the Fund's portfolio, increase the Fund's transaction costs, administrative costs and taxes and/or impact Fund performance.

In addition, if the nature of the Fund's portfolio holdings exposes the Fund to "arbitrage market timers," the value of the Fund's shares may be diluted if redeeming shareholders receive proceeds (and buying shareholders receive shares) based upon net asset values which do not reflect appropriate fair value prices. Arbitrage market timing occurs when an investor seeks to take advantage of the possible delay between the change in the value of a mutual fund's portfolio holdings and the reflection of the change in the fund's net asset value per share. A fund that invests significantly in foreign securities may be particularly vulnerable to arbitrage market timing. Arbitrage market timing in foreign investments may occur because of time zone differences between the foreign markets on which the Fund's international portfolio securities trade and the time as of which the Fund's NAV is calculated. Arbitrage market timers may purchase shares of the Fund based on events occurring after foreign market closing prices are established, but before calculation of the Fund's NAV. One of the objectives of the Trust's fair value pricing procedures is to minimize the possibilities of this type of arbitrage market timing (please see "Fund Account Information - Valuation - Foreign Securities – Potential Impact of Time Zones and Market Holidays").

Since the Fund may invest significantly in securities that are, or may be, restricted, unlisted, traded infrequently, thinly traded, or relatively illiquid (relatively illiquid securities), the Fund may be particularly vulnerable to arbitrage market timing. An arbitrage market timer may seek to take advantage of a possible differential between the last available market prices for one or more of these relatively illiquid securities that are used to calculate the Fund's net asset value and the latest indications of market values for those securities. One of the objectives of the Fund's fair value pricing procedures is to minimize the possibilities of this type of arbitrage market timing (please see "Fund Account Information - Fair Valuation – Individual Securities" under the heading "Fund Account Policies", below).

The Fund is currently using several methods to reduce the risk of frequent trading. These methods include:

- seeking the cooperation of Insurers and funds of funds to assist the Fund in identifying potential frequent trading activity;

- committing staff to selectively review on a continuing basis recent trading activity in order to identify trading activity that may be contrary to the Fund's Frequent Trading Policy;
- monitoring potential price differentials following the close of trading in foreign markets to determine whether the application of fair value pricing procedures is warranted; and
- seeking the cooperation of financial intermediaries to assist the Fund in identifying frequent trading activity.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders. There is no assurance that the Fund or its agents will gain access to any or all information necessary to detect frequent trading in Insurers' separate accounts. While the Fund will seek to take actions (directly and with the assistance of Insurers) that will detect frequent trading, it cannot represent that such trading activity can be minimized or completely eliminated.

Revocation of frequent trading trades. Transactions placed in violation of a Fund's Frequent Trading Policy or exchange limit guidelines are not necessarily deemed accepted by the Fund and may be cancelled or revoked by the Fund, in full or in part, as soon as practicable following receipt by the Fund and prompt inquiry of the intermediary.

Involuntary Redemptions

The Fund reserves the right to close an account (and involuntarily redeem any investment) if it is deemed to have engaged in activities that are illegal (such as late trading) or otherwise believed to be detrimental to the Fund (such as frequent trading), to the fullest extent permitted by law and consistent with the best interests of the Fund and its shareholders. Thus, for example, if upon inquiry the Fund and insurance company identify a contract owner that has engaged in late trading or frequent trading activities, the Fund may advise the insurance company that it will not accept future investments, or is redeeming any investment related to that contract owner. Involuntary redemptions may be in cash or in kind.

Fund Account Policies

CALCULATING SHARE PRICE

When they buy and sell shares, the Fund's shareholders pay and receive the net asset value (NAV) per share.

The value of a mutual fund is determined by deducting the fund's liabilities from the total assets of the portfolio. The NAV per share of a class of the Fund is determined by dividing the net asset value of the Fund's share class by the applicable number of shares outstanding of that share class. The Fund's NAV does not include any fee or sales charge imposed by variable insurance contracts for which the Fund is an investment option or funds of funds that purchase shares of the Fund. Investors should consult the contract

prospectus, disclosure document or Fund of Funds prospectus for more information.

The Fund calculates the NAV per share each business day as of 1 p.m. Pacific time or the regularly scheduled close of the New York Stock Exchange (NYSE), whichever is earlier. The Fund does not calculate the NAV on days the NYSE is closed for trading, which include New Year's Day, Martin Luther King Jr. Day, President's Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. If the NYSE has a scheduled early close, the Fund's share price would be determined as of the time of the close of the NYSE. If, due to weather or other special or unexpected circumstances, the NYSE has an unscheduled early close on a day that it has opened for business, the Fund reserves the right to consider that day as a regular business day and accept purchase and redemption orders and calculate its share price as of the normally scheduled close of regular trading on the NYSE.

When determining the NAV, the Fund values cash and receivables at their realizable amounts, and records interest as accrued and dividends on the ex-dividend date. The Fund generally utilizes two independent pricing services to assist in determining a current market value for each security. If market quotations are readily available for portfolio securities listed on a securities exchange (including exchange-traded funds), the Fund values those securities at the last quoted sale price or the official closing price of the day, respectively, or, if there is no reported sale, within the range of the most recent quoted bid and ask prices. The Fund values over-the-counter portfolio securities within the range of the most recent bid and ask prices. If portfolio securities trade both in the over-the-counter market and on a stock exchange, the Fund values them according to the broadest and most representative market. Prices received by the Fund for securities may be based on institutional "round lot" sizes, but the Fund may hold smaller, "odd lot" sizes. Odd lots may trade at lower prices than round lots.

Generally, trading in corporate bonds, U.S. government securities and money market instruments is substantially completed each day at various times before 1 p.m. Pacific time. The value of these securities used in computing the NAV is determined as of such times. Occasionally, events affecting the values of these securities may occur between the times at which they are determined and 1:00 p.m. Pacific time that will not be reflected in the computation of the NAV. The Fund relies on third party pricing vendors to provide evaluated prices that reflect current fair market value at 1 p.m. Pacific time.

To the extent that a Fund is invested in one or more open-end investment management companies (mutual funds), the Fund values shares of a mutual fund at the mutual fund's last determined NAV.

FAIR VALUATION - INDIVIDUAL SECURITIES

Since the Fund may invest in securities that are restricted, unlisted, traded infrequently, thinly traded, or relatively

illiquid, there is the possibility of a differential between the last available market prices for one or more of those securities and the latest indications of market values for those securities. The Fund has procedures, approved by the board of trustees, to determine the fair value of individual securities and other assets for which market prices are not readily available (such as certain restricted or unlisted securities and private placements) or which may not be reliably priced (such as in the case of trade suspensions or halts, price movement limits set by certain foreign markets, and thinly traded or illiquid securities). Some methods for valuing these securities may include: fundamental analysis (earnings multiple, etc.), matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. The board of trustees oversees the application of fair value pricing procedures.

The application of fair value pricing procedures represents a good faith determination based upon specifically applied procedures. There can be no assurance that the Funds could obtain the fair value assigned to a security if they were able to sell the security at approximately the time at which a Fund determines its NAV per share.

SECURITY VALUATION - U.S. PASS-THROUGH SECURITIES, CMO, ABS, MBS

Mortgage pass-through securities (such as Ginnie Mae, Fannie Mae and Freddie Mac), other mortgage-backed securities (MBS), collateralized mortgage obligations (CMOs) and asset-backed securities (ABS), generally trade in the over-the-counter market rather than on a securities exchange. The Fund may value these portfolio securities by utilizing quotations from bond dealers, information with respect to bond and note transactions and may rely on independent pricing services. The Fund's pricing services use valuation models or matrix pricing to determine current value. In general, they use information with respect to comparable bond and note transactions, quotations from bond dealers or by reference to other securities that are considered comparable in such characteristics as rating, interest rate, maturity date, option adjusted spread models, prepayment projections, interest rate spreads and yield curves. Matrix pricing is considered a form of fair value pricing.

SECURITY VALUATION - CORPORATE DEBT SECURITIES

Corporate debt securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may value these portfolio securities by utilizing quotations from bond dealers, information with respect to bond and note transactions and may rely on independent pricing services to assist in determining a current market value for each security. The Fund's pricing services uses independent quotations from bond dealers and bond market activity to determine current value.

SECURITY VALUATION - SENIOR SECURED CORPORATE LOANS

Senior secured corporate loans with floating or variable interest rates generally trade in the over-the-counter market rather than on a securities exchange. The Fund may value these portfolio securities by utilizing quotations from loan dealers and other financial institutions, information with respect to bond and note transactions and may rely on independent pricing services to assist in determining a current market value for each security. These pricing services may utilize independent market quotations from loan dealers or financial institutions and may incorporate valuation methodologies that incorporate multiple bond characteristics. These characteristics may include dealer quotes, issuer type, coupon, maturity, weighted average maturity, interest rate spreads and yield curves, cash flow and credit risk/quality analysis.

SECURITY VALUATION – MUNICIPAL SECURITIES – MATRIX PRICING (FAIR VALUATION)

Municipal securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund's pricing services use valuation models or matrix pricing to determine current value. In general, they use information with respect to comparable bond and note transactions, quotations from bond dealers or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date. Matrix pricing is considered a form of fair value pricing.

SECURITY VALUATION - OPTIONS

The Fund values traded call options at their market price as determined above. The current market value of any option the Fund holds is its last sale price on the relevant exchange before the Fund values its assets. If there are no sales that day or if the last sale price is outside the bid and ask prices, the Fund values options within the range of the current closing bid and ask prices if the Fund believes the valuation fairly reflects the contract's market value.

VALUATION - FOREIGN SECURITIES - COMPUTATION OF U.S. EQUIVALENT VALUE

The Fund generally determines the value of a foreign security as of the close of trading on the foreign stock exchange on which the security is primarily traded, or as of 1 p.m. Pacific time, if earlier. The value is then converted into its U.S. dollar equivalent at the foreign exchange rate in effect at 1 p.m. Pacific time on the day that the value of the foreign security is determined. If no sale is reported at that time, the foreign security will be valued within the range of the most recent quoted bid and ask prices. Occasionally events (such as repatriation limits or restrictions) may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the board of trustees.

VALUATION – FOREIGN SECURITIES – POTENTIAL IMPACT OF TIME ZONES AND MARKET HOLIDAYS

Trading in securities on foreign securities stock exchanges and over-the-counter markets, such as those in Europe and Asia, may be completed before 1 p.m. Pacific time on each day that the Fund is open. Occasionally, events occur between the time at which trading in a foreign security is completed and 1 p.m. Pacific time that might call into question the availability (including the reliability) of the value of a foreign portfolio security held by the Fund. As a result, the Fund may be susceptible to what is referred to as “time-zone arbitrage.” Certain investors in the Fund may seek to take advantage of discrepancies in the value of the Fund’s portfolio securities as determined by the foreign market at its close and the latest indications of value attributable to the portfolio securities at the time the Fund’s NAV is computed. Trading by these investors, often referred to as “arbitrage market timers,” may dilute the value of the Fund’s shares, if such discrepancies in security values actually exist. To attempt to minimize the possibilities for time-zone arbitrage, and in accordance with procedures established and approved by the Fund’s board of trustees, the investment manager monitors price movements by using a fair value pricing service offered through an independent pricing vendor.

The fair value pricing service is used to estimate the price of a security in a liquid market at the time of the NAV calculation (1 p.m. Pacific Time). If certain criteria are met, the foreign securities may be valued using the price from the fair value pricing services. The intended effect of applying fair value pricing is to compute an NAV that accurately reflects the value of the Fund’s portfolio at the time that the NAV is calculated, to discourage potential arbitrage market timing in Fund shares, to mitigate the dilutive impact of such attempted arbitrage market timing and to be fair to purchasing, redeeming and existing shareholders. However, the application of fair value pricing procedures may, on occasion, worsen rather than mitigate the potential dilutive impact of shareholder trading.

In addition, trading in foreign portfolio securities generally, or in securities markets in a particular country or countries, may not take place on every Fund’s business day. Furthermore, trading takes place in various foreign markets on days that are not business days for the Funds, and on which the Fund’s NAV is not calculated (in which case, the NAV of the Fund’s shares may change on days when shareholders will not be able to purchase or redeem Fund shares). Thus, the calculation of the Fund’s NAV does not take place contemporaneously with the determination of the prices of many of the foreign portfolio securities used in the calculation. If events affecting the last determined values of these foreign securities occur, the securities will be valued at fair value determined in good faith in accordance with the Fund’s fair value procedures established and approved by the board of trustees (as described above).

SHARE CLASSES

Class 1, Class 2, Class 4 and Class 5 shares of the Funds are identical except that Class 2, Class 4 and Class 5 each have a distribution plan or “rule 12b-1” plan, as described below.

Subject to applicable law, the board of trustees may from time to time, without the approval, vote or consent of shareholders of the Fund or any class, combine, merge or otherwise consolidate the shares of two or more classes of shares of the Fund with and/or into a single class of shares of the Fund, with such designation, preference, conversion or other rights, voting powers, restrictions, limitations as to dividends, qualifications, terms and conditions of redemption and other characteristics as the board of trustees may determine. Such transactions may be effected through share-for-share exchanges, transfers or sales of assets, shareholder in-kind redemptions and purchases, exchange offers, or any other method approved by the board of trustees.

Distribution and service (12b-1) fees Class 2, Class 4 and Class 5 each have a distribution plan, sometimes known as a rule 12b-1 plan, that allows the Fund to pay distribution fees to those who sell and distribute Class 2, Class 4 or Class 5 shares, as applicable, and provide services to shareholders and Contract Owners. Because these fees are paid out of Class 2’s, Class 4’s and Class 5’s assets on an on-going basis, over time these fees will increase the cost of an investment, and may cost you more than paying other types of sales charges. While the maximum amount payable under most Funds’ Class 2 rule 12b-1 plan is 0.35% per year of the Fund’s Class 2 average daily net assets, the board of trustees has set the current rate at 0.25%. However, Franklin Strategic Income VIP Fund, Templeton Developing Markets VIP Fund, Templeton Foreign VIP Fund and Templeton Global Bond VIP Fund each have a maximum rule 12b-1 plan fee of 0.25% per year. The maximum amount payable under each applicable Fund’s Class 4 rule 12b-1 plan is 0.35% per year of the Fund’s Class 4 average daily net assets. The maximum amount payable under the Franklin VolSmart Allocation VIP Fund’s Class 5 rule 12b-1 plan is 0.15% per year of the Fund’s Class 5 average daily net assets. A portion of the fees payable to Franklin Distributors, LLC (Distributors) or others under the rule 12b-1 plan may be retained by Distributors for distribution expenses.

REDEMPTIONS

Typically, the Fund uses cash and cash equivalents held in its portfolio or sells portfolio assets to meet all redemption needs. In unusual circumstances or under stressed market conditions, the Fund may use other methods to meet redemptions, such as the use of lines of credit or interfund lending in reliance on exemptive relief from the SEC.

ADDITIONAL POLICIES

Please note that the Fund maintains additional policies and reserves certain rights, including:

- The Fund may restrict, reject or cancel any purchase orders, including an exchange request.

- Typically, redemptions are processed by the next business day provided the redemption request is received in proper form and good order, but may take up to seven days to be processed if making immediate payment would adversely affect the Fund or there is another cause for delay (for example, if you sell shares recently purchased, proceeds may be delayed until your check, draft or wire/electronic funds transfer has cleared). In certain circumstances, however, the Fund may not have the ability to delay a redemption request or may not have the time to determine whether a particular redemption would have an adverse effect on the Fund before the redemption request is paid.
- At any time, the Fund may establish or change investment minimums.
- The Fund may make material changes to or discontinue the exchange privilege on 60 days' notice to insurance company or Fund of Fund shareholders, or as otherwise provided by law.
- Purchases of shares of the Fund (including the purchase side of an exchange) may be made only when such shares are eligible for sale in the appropriate state or jurisdiction.
- In unusual circumstances, we may temporarily suspend redemptions or postpone the payment of proceeds, as allowed by federal securities laws.
- For redemptions over a certain amount, the Fund may, but is not required to, pay redemption proceeds in securities or other assets rather than cash (also known as a redemption in-kind) if the investment manager determines it is in the best interest of the Fund, consistent with applicable law. The investment manager will, in its sole discretion, determine whether a redemption in-kind will be considered for a particular redemption request or type of redemption request. In certain circumstances, however, the investment manager may not have the ability to determine whether a particular redemption could be paid in-kind before the redemption request is paid. If a redemption request is redeemed in-kind, investors should expect to incur transaction costs upon the disposition of the securities received in the distribution.
- To permit their investors to obtain the current price, participating insurance companies and funds of funds are responsible for transmitting all orders to the Fund promptly.

Questions

More detailed information about the Trust and the Fund's account policies can be found in the Fund's SAI. If you have any questions about the Fund, you can write to us at One Franklin Parkway, P.O. Box 7777, San Mateo, CA 94403-7777. You can also call us at 1-800/362-6243 (a toll-free number). For your protection and to help ensure we provide you with quality service, all calls may be monitored or recorded.

For More Information

For information on the Fund, including a free copy of the Fund's prospectus and Statement of Additional Information, Financial Statements, and the Fund's Annual and Semiannual Reports, contact your financial advisor or the insurance company offering your Contract.

Shares of the insurance funds of Franklin Templeton Variable Insurance Products Trust (FTVIPT) are not offered to the public; they are offered and sold only to: (1) insurance company separate accounts to serve as the underlying investment vehicles for variable contracts; (2) certain qualified plans; and (3) other mutual funds (funds of funds).

Not all Funds and classes are available in all Contracts. For information on the terms of investment in a Contract, please consult the Contract prospectus that accompanies this Fund prospectus.

You can learn more about the Fund in the following documents:

Annual/Semiannual Fund Reports to Shareholders and Form N-CSR Filed with the SEC

Contain additional information about the Fund's investments. The Fund's annual report also discusses the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements.

Statement of Additional Information (SAI)

Contains more information about the Fund, its investments, policies, and risks. It is incorporated by reference into (is legally a part of) this prospectus.

Reports and other information about the Fund are available on the EDGAR database on the SEC's website at www.sec.gov, and copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.
